Liaquat National Medical College

Prospectus - 2024

The LNMC Logo

- The image of the man in the center is based on the famous classic image of the Vitruvian Man drawn by Leonardo da Vinci.
- The image depicts our graduates whom we perceive to spread light of knowledge and tend to the suffering community with compassion.
- This classic depiction of a human being is combined with a graphic representation of a chromosome representing the latest medical research in Genetics on which most of all future healthcare's will be based.
- A book is also shown towards the bottom as a symbol and source of knowledge, teaching and learning.
- The globe and the overall blue color show universality of the science of healing and healthcare.
- The human silhouettes represent the community under the protective arms of our graduates.

President's Message

Syed Shahid Ali

President
Governing Body - LNH

I am gratified, indeed, to be able to extend to students an invitation to study at Liaquat National Medical College.

Liaquat National Hospital was established over fifty years ago after the assiduous efforts of Syed Wajid Ali and his associates. The vision at its genesis, as is the policy now, was to offer suffering humanity alleviation from affliction.

Quality was to be pursued through a profound commitment to sympathetic patient care, a maximum possible level of expertise and provision of the best technology available, at an affordable price.

Through the years, Liaquat National Hospital has followed a policy of adding to services. Thus, the hospital evolved advanced and comprehensive post graduate medical training, a college of nursing, a school of Physiotherapy and a College of Medical Laboratory Technology.

Along with this extension of these services, there has been a concerted effort to continuously upgrade and add to existing equipment.

With this endeavor to improve and expand, the Liaquat National Medical College was established for under graduates. The College has the privilege of including some of the most eminent and highly trained professionals and instructors in the country. The purpose of the College is not only to impart knowledge and the best training possible to the students, but to imbue them with empathy for the sick and the suffering.

It is our earnest hope and endeavor to turnout students who are competitive at an international level and never flag in the pursuit of medical excellence and ethical practice.

I wish the college well, and hope that its students contribute significantly to the health and well-being of the people of Pakistan.

Medical Director's Message

Prof. Dr. Salman Faridi

Medical Director
LNH & MC

LNMC has recently completed eighteen years as a medical college. During this relatively short life it has already established a reputation for quality and merit, where students perform with distinction in both undergraduate and postgraduate examinations. Our graduates today occupy senior positions in some of the best hospitals in Pakistan and abroad.

At LNMC we endeavour to blend high quality academics with a solid grounding in clinical patient care and professional ethics. To add to this triad is an encouragement to conduct research and acquire the practical skills that are necessary for clinical practice today. Our research and Skills Development Centre is a testimony to our focus on this important aspect of a medical student's training.

Major expansions and developments at Liaquat National Hospital have also further enhanced the high quality of clinical training imparted at LNMC. As a leading healthcare service with the latest equipment and facilities, a highly trained and experienced faculty and a large volume of patients, LNH offers our students a training opportunity that matches the best anywhere in the country or even internationally.

Students wishing to join LNMC must remember that it is not enough to graduate as good doctors. They must also acquire the attributes that are necessary to utilize their skills and abilities for the betterment of the society and the environment that they live in. They must contribute to promoting better health awareness and healthier lifestyles so that our people, too, can enjoy the benefits of modern healthcare that are available to their fellow citizens in more developed countries and communities.

Every student must instill in himself or herself a quest for excellence, a desire to pursue and acquire the best that the educational process has to offer, to promote merit and to practice the highest standards of intellectual and professional integrity and probity. At LNMC we offer you the opportunity of an exciting, albeit exacting, learning experience, that trains you to compete well with the best graduates internationally and also prepares you for the stern challenges that you will face to function as good caring citizens who wish to bring good health to every household and citizen in our land.

Principal's Message

Prof. Dr. Karim Ullah Makki

HOD | Department of Internal Medicine,
Principal - LNMC

Liaquat National Hospital & Medical College, which is well known in Medical field. PM&DC announced central admission for every province in 2018. LNHC was the first choice of all the students and our 100 seats were filled by the first 200 meritorious students. 5 year down the lane 2019, 2020, 2021, 2022 & 2023 we Alhamdulillah maintained our standards. In 2022 MDCAT was conducted by PM&DC for whole Pakistan & maintaining the previous record, the best students of Sindh opted the LNHC as their first choice. This year, we are delighted to invite applications for the 19th batch for the 5 years MBBS Program.

We have the largest faculty in basic & clinical side (more than 175) in whole Pakistan in private sector & they are the best qualified and most experienced teachers. Liaquat National Hospital which is attached with Liaquat National Medical College is the largest & best teaching Hospital of the country. Several new faculty members have joined LNMC in the Basic as well as in the Clinical subjects during the last year. The Research and skills Development Centre has been upgraded by providing state of the art mannequins and computerized surgical skill simulators for the benefit of students and young doctors.

We have very strong mentorship program, where mentees can meet their mentors and share their, academic, social and other problems & get valuable advice.

We enhance our student's capabilities by engaging them in extracurricular activities. Besides achieving high grades, our students have also been taking part in inter collegiate Sports Tournaments, Debates, Research, Art & Culture, and Music & Social work. Their devotion and unrelenting pursuit of excellence are the valuable tools that helps them to stay focused and driven.

Hard work seems purposeless without awards and rewards so number of Annual Academic Merit Awards; need base scholarships, kinship scholarships and other awards and certificates for extra – curricular activities are in place.

The Best Graduate (Syed Wajid Ali Shah medal, best overall Academic performance over five year) award was given to Dr. Suhira Tariq, along with a cash award of Rs.400000/-. Dr. Syeda Hira Ejaz was also awarded the merit award for the 1st position in final year MBBS with a cash prize of Rs.250000/-. Dr. Suhira Tariq received the merit award for 2nd position with a cash prize of Rs.200000/-, while Dr. Abdullah Moiz received the merit award for 3rd position with a cash prize of Rs.150000/-

The most exciting award of Principal's Medal & Medical Director's Medal were awarded to Dr. Nimra Ahmed & Muhammad Farrukh Siddiqui respectively. In the memory of late Principal & Dean LNMC Prof. Amir Ali Shoro, Medal was awarded to Dr. Suhira Tariq Khan for best academic achievement in first two years.

To appreciate our alumni's success, Best Alumnus Medal was awarded to Dr. Muhammad Sohaib Asghar of class of 2016.

Our alumni have not only proved them here in Pakistan but also in abroad & they achieve various scholarships and training program like in USA, UK & Canada.

Living In Karachi

Karachi is Pakistan's largest city, industrial & financial hub. It has maintained its status as the cultural, intellectual and commercial epicenter of the country since independence.

THE CITY

The city of lights, once a small fishing village along the Arabian Sea coast has experienced an unparalleled growth over the past six decades. Because of its geographic location and enormous potential for economic growth and development, it continues to attract immigrants from all over the country and can truly be called a metropolitan city. In the recent past it has developed rapidly and new projects have been initiated to ease the traffic congestion and make major routes signal free with the construction of overhead bridges and underpasses.

SHOPPING

There are large shopping precincts spread all over the city which is famous for its bazaars. The collections of products on the shelves of its shops from within and outside the country make it a most delightful place to shop in. Modern malls and shopping centers are springing up fast and are making shopping a pleasurable exercise.

AFFORDABLE HOUSING AND GOOD EDUCATIONAL INSTITUTES

Numerous high rise apartment complexes and great old houses along with a number of developments means there is something here for everyone. The city also has a number of educational institutions that are recognized nationally and globally.

ENTERTAINMENT

Karachi has always remained foremost in providing entertainment that suits all tastes and ages. The city is home to a number of renowned personalities of the entertainment world who have revived the theatre, while the famous cinemas of the city are also experiencing resurgence. The city and its vicinity has a pool of diversified places to choose from such as parks, pools, waterfronts, beaches, farmhouses and amusement parks etc.

MUSEUMS AND GALLERIES

The National Museum displays exhibits from more than 5000 BC, and has always attracted an enormous amount of interest. The history of the city was depicted in the exhibits at Mohatta Palace, a place of historical significance that holds art and culture exhibitions. The city also boasts of numerous art galleries which exhibit famous works of past and present masters.

SPORTS

For the enthusiasts, the city offers facilities of a range above and beyond any other place in the country. From the more conventional sports like cricket, field hockey, football, golf and squash to snorkeling, scuba diving and sea angling there are opportunities to suit every interest. The city also has Marina and Yacht clubs and excellently planned and landscaped Golf Clubs with facilities for night golf.

EATING PLACES

There are many five star hotels, swank restaurants, specialist eating places such as Boating Basin and Zamzama etc. as well as franchised chain restaurants catering to all tastes and pockets in Karachi.

Liaquat National Medical College

Liaquat National Medical College

At Liaquat National Medical College (LNMC) we offer you an unparalleled learning experience in healthcare coupled with a resolve to create professionals that would carry the torch forward and make us proud.

Liaquat National Medical College (LNMC) is on a continuous quest for excellence in education, research, clinical practice, training and community services.

OUR VISION

Liaquat National Medical College (LNMC) will be a national and international center of excellence in healthcare, education, research and community development.

OUR MISSION

To offer an unparalleled learning experience in health sciences with a resolve to produce ethical and dedicated professionals who will deliver evidence based quality healthcare globally, and produce a visible impact on the health of the community.

RECOGNITION

Our five year MBBS course is recognized by PMDC.

AFFILIATION

Liaquat National Medical College (LNMC) has been affiliated with the Jinnah Sindh Medical University since 2015 and is allowed to impart training to 100 students each year for MBBS degree. Our students are being trained annually in modular based system.

REGISTRATION WITH FOREIGN BODIES

The Medical College is registered with:

1. Education Commission for Foreign Medical Graduates (ECFMG) USA.
2. Foundation for Advancement of International Medical Education and Research (FAIMER).
3. International Medical Education Directory (IMED).
4. Avicenna (WHO) Directory.
5. General Medical Council (GMC) U.K.
6. Canadian Resident Matching Service (CaRMS).
7. Health Professional Council of South Africa (HPCSA).
8. Australian Medical Council (AMC).
9. Association of American Medical Colleges (AAMC).
10. The Talloires Network

WE AT LNMC ARE COMMITTED TO

- Ensure a curriculum, meeting international requirements.
- Address global, national and provincial needs and incorporate same in teaching.
- To promote research in Biomedical Sciences, Healthcare and Medical Education and utilize the findings for betterment of patients, services and curriculum.
- To develop ethical, dedicated and compassionate leaders, who are respectful and responsive to patient's needs and values?
- To produce competent professionals who deliver healthcare services of highest quality.
- To provide an environment that encourages student's engagement in sports, cultural and social services for the development of caring, critical thinking and well-rounded personalities.

FACULTY OF LNMC

The institute has highly qualified and experienced faculty in basic and clinical sciences lead by our esteemed Principal Prof. K.U. Makki who has a teaching experience of over 40 years and has been Chairman Department of Medicine Dow University of Health Sciences and is currently Head of Department of Medicine at LNH.

A large percentage of faculty members have been trained in USA & UK and are keen to make their contributions to the development of young professionals who would be the leaders of the future.

Program Outcomes of LNMC

PROGRAM OUTCOMES OF LNMC

By the end of the five-year MBBS program, all medical graduates will be able to:

- Apply clinical and biomedical sciences knowledge in developing management plans for common clinical presentations in different healthcare settings.
- Develop plans for patient care that reflect patients' needs and values.
- Practice evidence based clinical decision making.
- Perform common clinical procedures safely.
- Practice preventive healthcare and health promotion.
- Maintain patient safety in all healthcare settings.
- Communicate effectively with the patients, their families, and members of healthcare team.
- Demonstrate teamwork and leadership skills in professional practice.
- Demonstrate professional and ethical behavior in performing professional responsibilities.
- Conduct scientific research proficiently resulting in readiness for evidence based medical practice.
- Demonstrate commitment to life-long learning.

Central Amenities at LNMC

LIBRARY

The library has undergone significant expansion and is housed within the Medical College. At LNMC, a collection of more than 3,000 medical electronic books and over 8,300 textbooks in print format is available, covering basic and clinical subjects, with annual additions. The LNMC library is adequately staffed and is open from 8:30 AM to 10:00 PM from Monday to Saturday, while on Sunday, the library hours are from 10:00 AM to 6:00 PM.

LEARNING RESOURCE CENTRE

A Learning Resource Centre has been created within the library which is fully computerized and internet equipped stations to facilitate web based learning. Access to network computers is available to users (students and faculty) of this facility. It is linked to the Digital library (Courtesy of HEC) with access to a large number of text books and medical journals. There is an extensive collection of audiovisual material to augment learning in various basic and clinical sciences. The lectures conducted by the faculty are uploaded in the audio visual library of LNMC and are available on request.

Teaching aids such as Moodle are also utilized to implement e-learning. Additionally, students and faculty have internet access through Wi-Fi on their phones and laptops.

STUDENT CAFETERIA

A Cafeteria is located in the Centre of the campus on the ground floor of link building of the medical college, allowing easy access to faculty, staff and students. It provides healthy and tempting meals for visitors. A full lunch menu is also available at very subsidized rates. A new state of the art Cafeteria (Cafe Sukoon) is also functional to cater for Faculty, Staff, and Students & Visitors. Baithak an open air cafeteria that serves hot & cold beverages and snacks in a sophisticated ambiance is also present.

BOOK SHOP

A book shop with a wide range of text and reference medical books of all disciplines of medicine is available within the premises of the Medical College. The book shop has all necessary stationery; equipment's and Photostat facility for the students. Book Shop is also well equipped with gift items of wide choice of souvenirs.

ACADEMIC COUNCIL COMPLEX

This complex has a large auditorium, several lecture theatres and a Hospitality Suite which are fully equipped with latest audiovisual facilities. The academic council complex also houses the Department of HealthCare Education (DHCE) to meet the changing need of the profession and ensure provision of quality education.

TEACHING FACILITIES

The Link Building has six Tutorial Rooms with computers and multimedia projectors and houses the administration office along with faculty offices. The old block houses five air-conditioned lecture halls equipped with all requisite audio visual aids and also has multiple air-conditioned labs, dissection hall and museums. The labs, museum and dissection hall are all as per PMDC requirement and furnished with latest equipment's and have updated manuals and safety mechanisms in place.

ANIMAL HOUSE

Animal House at Liaquat National Hospital and Medical College has been established and is functional. An Animal keeper has been appointed to look after the animals. At present rats, mice, rabbits and guinea pigs are available for the practical sessions of undergraduate students of LNMC.

The facility of animal house is to be utilized for initiating research projects based on animal studies by faculty and students. Faculty members are encouraged to start their research programs and utilize the animals. Other animals like sheep, dogs etc will also be kept for research projects as per requirement of the Faculty.

HOSTEL FACILITIES

Limited accommodation (subject to the availability of seats) is available on the premises for both male and female medical students from out of Karachi. Accommodation is provided on first come first facilitated bases.

TRANSPORT FACILITIES

The college has also arranged for transport facilities for students which ensure that they safely reach college on time.

Students Support Services

LNMC ADMINISTRATION

This office deals with a wide range of issues pertaining to a student's life at the campus such as coordinating admissions, examination, accommodation, financial matters, research and extra-curricular activities.

CAREER ADVISORY SERVICES

We at LNMC regard career building as an important responsibility. In addition to individual counseling the advisory service holds seminars and workshops to increase general awareness of the professional pathways available. It is extremely important that the students become fully aware of future prospects and career pathways. Unless the students possess the awareness and make timely decisions a great deal of time is wasted and the community loses the services of a talented professional.

MENTORSHIP

The Senior Faculty members of Liaquat National Hospital & Medical College (LNH&MC) are each assigned a small group of medical students for mentorship and counseling. The office hours indicating availability of faculty is provided to students who can meet or contact on phone or through e-mail in order to discuss any academic as well as non-academic or personal matters with their mentors. All mentors have been assigned 3 to 5 students.

Mentors are required to meet with the students and send their reports to the Principal on a regular basis. Senior faculty of the medical college and hospital also mentors for extra-curricular activities and head student's Societies.

In addition to the mentors, the student is free to visit any faculty that they need help from. Junior faculty is often assigned to coach one to one weak students. Demonstrators and lecturers are also available to help them in small groups and lab sessions and they remain in close contact with the students to ensure smooth execution of teaching process.

CAREER FAIR

Regular career fairs are held to apprise students of possible career pathways in clinical and basic fields besides research, public health, pharmaceutical & insurance industry etc. Renowned personalities in respective fields are invited to provide career counseling to students. Students are also subsequently given opportunities to meet with the best in the field professionals and obtain career guidance on one to one basis.

SKILLS DEVELOPMENT CENTRE

Liaquat National Hospital has been taking a lead on national level in providing certifiable clinical and resuscitation skills training for almost fifteen years.

The department comprises of latest training equipment's as per international standards and has a trained certified dedicated team. The department has instrument rooms, interactive models and simulators. The participants are certified only after successfully getting through their assessments. This is a state of the art "ISO" certified department and runs its AHA certified BLS and ACLS courses.

RESEARCH

LNMC students are taught research & facilitated in conduct of research they develop protocols which are reviewed by faculty. All the protocols are then assessed by research committees, which comprises of Chairperson and 8 – 10 members. The research committee has developed its own guidelines for submission of research projects meeting the international Helsinki Guidelines. Once the research protocol along with the budget & time line is approved then it is referred to ethical review for final approval. Research committee encourages students & faculty to participate in national or international conferences and submit articles to international & national journals. Additionally the college also has a research society which holds lectures and research expo. To date our Medical students have published multiple papers in local and international journals as well as read papers both locally as well as internationally.

Awards & Scholarships

1. MERIT SCHOLARSHIP:

Students securing high marks in first fourth professional MBBS examination of university are awarded cash award as per policy according to following scheme:

- i. For First Position Rs. 125,000/-
- ii. For Second Position Rs. 100,000/-
- iii. For Third Position Rs. 75,000/-

Students securing highest marks in final professional MBBS examination are awarded cash award as per policy according to following scheme:

- i. For overall best Graduate Rs 400,000/-
- ii. For First Position Rs. 250,000/-
- iii. For Second Position Rs. 200,000/-
- iv. For Third Position Rs. 150,000/-

2. NEED BASED SCHOLARSHIP:

Liaquat National Medical College (LNMC) awards Need Based Scholarship every year to deserving students.

PROCEDURE FOR APPLYING NEED BASED SCHOLARSHIP:

- Need Based Scholarship is announced every year for all students through a circular disseminated via email and displayed on noticed boards
- Students of all classes are required to submit his/her application in prescribed format within a period of one month from the announcement date.
- Deserving students can apply each year for Need Based scholarship.
- The decision on numbers and amount of scholarship per class is made by a committee comprising of competent authority of LNMC considering the financial needs of students and their decision is final.
- The process is concluded after the evaluation of all applications received from the students and interview process of candidates.
- Finally, the allocated amount is communicated to the students via official letter from the competent authority by stating amount and class in which a student gets scholarship.
- The student needs to perform satisfactorily in academics and maintain discipline else the scholarship may be withdrawn.

MEDALS

- Wajid Ali Gold Medal for overall best Graduate
- Dean's Medal (for best all round performance – Female Graduate)
- MD's Medal (for best all round performance – Male Graduate)

2. KINSHIP SCHOLARSHIP DISCOUNT IN TUITION FEE:

For siblings of existing students, faculty & staff.

3. OTHER AWARDS /CERTIFICATES:

Awarded to the Best Debater, Best Poster Presentation, Best Athlete, Best Singer and Best Actor. Certificates are given to the students obtaining distinctions in different disciplines and activities.

	Surgical Sub Specialties Pediatrics Gynecology & Obstetrics					

CURRICULUM

Liaquat National Medical College has implemented integrated Spiral Curriculum that ensures alignment with the guidelines of the Jinnah Sindh Medical University and PM&DC. In Spiral Curriculum, students have opportunities to revisit segments of learning throughout their five years of education. Student learning begins with fundamental concepts and with progression to each new phase students build new concepts with increasing complexities based on previous learning.

This helps student to make links between concepts and application of knowledge with understanding. In this curriculum, students learn through modules which integrate basic sciences knowledge to clinical problems. For example, Cardiovascular system is introduced in MBBS first year and revisited in MBBS third year.

The focus of MBBS first and second year is more on normal and abnormal structures and functions of the cardiovascular system, while in the later years it focuses on common clinical presentations along with diagnosis, relevant investigations, and prevention of diseases. Exposure to clinics and hospital wards is also embedded in modular teaching.

For MBBS First year, a structured Study Skills course is offered for students to cope with academic stress encountered in medical studies. Longitudinal courses on research, communication skills, patient safety, professionalism and ethics are also integrated in the spiral curriculum. In addition, Islamiat and Pakistan studies are part of the curriculum.

TEACHING/ LEARNING METHODOLOGIES

- Interactive Lectures
- Case- Based Learning
- Team- based learning
- Tutorials
- Practical's
- E-Learning
- Simulation based learning
- Clinical learning experience including learning at bed-side, ambulatory care, operation theatre and community out-reach centers
- Field Visits
- Self-directed learning

STUDY GUIDE

LNH&MC has developed modular study guides to help students plan their studies in accordance with the objectives and teaching activities. The study guide informs students on the outcomes and objectives to be achieved through multiple disciplines, learning experiences and use of recommended learning resources for self- study. In addition, study guide provides information on different assessment methods and examination rules that help students prepare for examinations.

ASSESSMENT

Medical students will be assessed continuously throughout the year by multiple methods such as, quizzes, assignments Module exam, Mid-term and Pre-professional examination.

- Each theory paper comprises of one best type MCQs
- Clinical examinations are Objective Structured Practical or Clinical Examinations (OSPE/OSCE) format.
- Students absent in module exam are not allowed to sit for Midterm and Pre-professional examination
- LNH&MC is affiliated with the JSMU which conducts the MBBS annual & Retake Professional examinations for all five years of education.

EXAMINATION RULES & REGULATIONS ANNUAL EXAMINATIONS

- JSMU schedules Annual examinations on completion of academic year.
- Annual examination carries 80% weightage.
- Internal evaluation carries 20% marks in JSMU examination.

INTERNAL EVALUATION

- LNMC is responsible for internal evaluation of MBBS students.
- Mid-term and pre professional examinations comprising of Theory and Practical / Clinical Examinations are held in the middle and end of the academic year respectively
- MBBS Students' aggregated scores in module exam, mid-term and pre-professional examinations are submitted to JSMU that constitute 20% of weightage of the Professional exam

JSMU GRADING SYSTEM

- Based on GPA – 4 system
- A candidate obtaining GPA less than 2.00 (50%) is declared un-graded (fail).

RETAKE EXAMINATION

- JSMU conducts Retake examination for students failing annual examinations.

**MBBS Admission Policy for Session
2024 - 25**

MBBS Admission Policy for Session 2024 – 25 (Class of 2030)

ADMISSION ON LOCAL SEATS:

As per PMDC Act 2022 referred to be adhered to by notification PF-1-C-PM&DC/Notification/2024/529 dated 23rd August 2024, for admission at Liaquat National Medical College, a candidate must have:

- Passed the MDCAT examination as per PMDC requirement
- Obtained a Higher Secondary School certificate qualification ("HSSC") or an equivalent 12th grade qualification recognized in Pakistan and having obtained a minimum of sixty percent (60%) marks therein, or a higher percentage as may be notified by the Pakistan Medical and Dental Council; and
- Passed the mandatory subjects of biology and chemistry. The student may opt to qualify either physics or mathematics in the examination of the Higher Secondary School Certificate or an equivalent 12th grade qualification recognized in Pakistan.
- Students are required to appear for and successfully clear the interview.
- Proficiency in English language, both written and verbal is required.

ADMISSION ON FOREIGN / DUAL NATIONAL / OVERSEAS PAKISTANI QUOTA SEATS

As per PMDC act 2022 referred to be adhered to by notification PF-1-C- PM&DC / Notification/2024/529 dated 23rd August 2024, the student admitted against foreign / Dual National /overseas Pakistani quota shall have to fulfill the following admission criteria:

- A foreign quota seat candidate should hold a permanent foreign nationality or be an overseas Pakistani (being a Pakistani citizen permanently resident in a foreign country), and who has studied and passed HSSC 12th grade examination or equivalent from outside Pakistan and is a resident of a foreign country at the time of applying for admission and possess a certificate from the institution last attended to this effect. The student must pass the mandatory subjects of biology and chemistry and may opt to qualify either physics or mathematics in the examination of the Higher Secondary School Certificate or an equivalent 12th grade qualification recognized in Pakistan.
- The mandatory requirement of MDCAT shall not apply to students seeking admission on a special program seat predefined exclusively for foreign students and on the seats reserved for overseas Pakistanis. Such students shall qualify SAT-II with minimum score of 550 in each subject or a foreign MCAT examination or UCAT examination with 50% marks in the subjects mentioned above.
- Provided further that a student admitted on a foreign seat shall pay the fee as a foreign student regardless of any change in status of such student during the program of study. A foreign student shall pay the prescribed fee in foreign exchange only.

- Students are required to appear for and successfully clear the interview.
- Be proficient in English language, both written and verbal.

THE STRUCTURE OF AN INTERVIEW

With regards to the structure of interview, the interview process shall entail filling of a general questionnaire where questions shall be asked with regards to the students, his / her interest, aspirations, extra-curricular activities, self-assessment etc. Subsequently, the students shall be meeting our panel of faculty members who shall further interview the candidates and gauge:

- Aptitude
- Communication skills
- Logical / analytical thinking
- Problem solving / decision making
- Personal attributes important to being a doctor e.g. empathy, compassion, social work
- Character assessment to determine whether a team player, has leadership qualities etc

ADMISSION PROCESS

- The admission process shall be conducted through an online admission portal.
- Applicant shall pay the Application Registration Fee (Rs.2,000) as per PMDC policy by printing voucher from the portal, depositing payment in bank and uploading the receipt in the portal.
- Only applications which have been submitted in time and have uploaded supporting documents including evidence of paid application processing fee shall be called for an interview.
- LNMC shall issue provisional and final merit lists of all students on its official website taking into account results of MDCAT, other exam results and interview.
- A student when accepting admission to our college shall be under an obligation to disclose if a prior admission has been accepted by him/her to any other college, and such student shall prior to accepting such latter admission must in writing inform the prior college of cancellation of their acceptance with a copy to the designated email to PMDC & LNMC.
- If any student declines admission offer or does not pay fee by voucher due date, next applicant on the merit list will be offered admission against such seat.
- The final list of admitted students shall be submitted to PMDC through PMDC Online Portal.

Basic Science, Clinical Departments & Administration

College Administration

ADMINISTRATION

The LNMC administration plays an active role in smooth conduct of day to day activities of the medical college through its various sections.

The Student's Affairs Section of LNMC through its various sub sections, undertakes different functions. One section facilitates student's enrolment with the Universities and PMDC. Collection of examinations forms, admit cards, Marks Sheets and Degrees from Universities and their timely distribution. Compilation of attendance, preparation and issuance of different certificates / letters as and when required by students and foreign bodies.

Another section is involved in disseminating time table, circulars, notices related to classes and ward rotations, examination and electives and making necessary arrangements for the same.

The third part of student's section is involved in external linkage with other global medical institutions as regards to verification of academic record of graduates / students and arranges Webinars with global bodies. The section has close professional relations with ECFMG, USMLE, GMC, IMED, CaRMS, AMC, HPCSA and FAIMAR.

Administration Section of LNMC is involved in arrangement of events such as Admissions, Convocation, students Co-curricular and extra-curricular activities etc. It looks after, maintenance of building / furniture fixture and monitoring / surveillance of premises.

Finance Section is involved in facilitating students and their parents in submission of college fees; it invites and compiles application for grant of different scholarships to students. And reviews budgetary needs of LNMC

Human Resource Section monitors the faculty and staffing needs of the LNMC and facilitates in day to day HR matters.

IT section at LNMC is the back bone of administration; it is responsible for creating a paperless environment and developing different soft-wares.

Anatomy

INTRODUCTION

The subject of Anatomy is a foundational pillar among the basic sciences in medical education. Established in 2006, the Department of Anatomy at our institution has been an integral part of the medical college since its inception. The department is dedicated to delivering an undergraduate integrated medical curriculum in collaboration with Jinnah Sindh Medical University (JSMU) and other allied health programs. Through its commitment to academic excellence and hands-on learning, the Department of Anatomy plays a crucial role in shaping future medical professionals.

SERVICES

The Department of Anatomy boasts a spacious, air-conditioned dissection hall equipped for cadaveric dissection, offering students hands-on experience in human anatomy. The department's air-conditioned museum houses a vast collection of plastic models, showcasing key aspects of gross anatomy, embryology, neuroanatomy, and other body structures. Additionally, it features an extensive collection of original prosecuted specimens and a well-stocked bone bank. The histology lab is equipped with modern multi-headed and binocular microscopes, providing students with access to a wide range of tissue and organ slides. Advanced multimedia technology are in place, enabling students to observe slides on LED monitors, enhancing the learning experience through digital teaching aids.

UNDERGRADUATE TEACHING

The Department of Anatomy comprises a team of highly experienced senior professors and well-trained faculty members. The teaching methodology integrates modern learning approaches, including Self-Directed Learning, Large Group Interactive Sessions (LGIS), Small Group Discussions (SGD), Case-Based Learning (CBL), Team-Based Learning (TBL), and flipped classroom techniques. Students also gain practical experience through hands-on training and human cadaveric dissections. Regular formative assessments are conducted via MCQs and OSPEs, with consistent feedback provided to help students achieve academic excellence.

POST-GRADUATE TEACHING

Liaquat National Hospital and Medical College is recognized by the College of Physicians and Surgeons Pakistan (CPSP) for FCPS training in the subject of Anatomy, offering specialized postgraduate education.

RESEARCH & FACULTY DEVELOPMENT PROGRAM

The department places a strong emphasis on medical research. Faculty members are actively encouraged to conduct research, and a journal club is held every two weeks to foster a research-oriented culture. To further enhance leadership and teaching skills, regular workshops are conducted as part of a comprehensive faculty development program.

Biochemistry

INTRODUCTION

The Department of Biochemistry is dedicated to delivering high-quality education to undergraduates in the MBBS and BS Medical Technology programs. Our distinguished faculty, consisting of highly qualified PhD professionals, ensures the highest standard of scientific instruction. Our Biochemistry laboratory is designed to offer a superior learning environment, featuring spacious, well-lit, and air-conditioned facilities fully equipped in compliance with PMDC specifications.

CLINICAL CORRELATION

We emphasize the practical application of Biochemistry by integrating clinical cases, problem-solving exercises, and real-life scenarios into our curriculum. This approach helps students appreciate the relevance of their theoretical knowledge in clinical practice, bridging the gap between classroom learning and real-world medical situations.

CONTINUOUS PROFESSIONAL DEVELOPMENT

Our faculty members are committed to staying at the forefront of the field by participating in conferences, workshops, and training programs. This ongoing professional development ensures that they provide the most current and relevant education, incorporating the latest advancements in Biochemistry, molecular cell biology, and genetics.

RESEARCH & PUBLICATIONS

The department actively engages in research, with students participating in collaborative projects with other clinical disciplines. This involvement introduces medical undergraduates to research methodologies and demonstrates how medical biochemistry intersects with clinical outcomes. Our research findings are published in prestigious national and international medical journals. The department is also equipped with modern instruments and advanced tools for molecular biology research.

ACHIEVEMENTS

We are honored to be recognized by the CPSP for our FCPS program. Our facilities are fully equipped to support advanced education and research.

MISSION STATEMENT

In an era increasingly defined by bioinformatics, translational, and regenerative medicine, the foundational principles of biochemistry and molecular biology remain crucial. As Jeffrey KA aptly stated, “Today’s Science, tomorrow’s medicine,” our mission is to establish a cutting-edge center for teaching and learning, characterized by a dynamic and clinically relevant curriculum in Biochemistry, molecular cell biology, and Genetics.

Community Medicine

INTRODUCTION

The health care approach has experienced a paradigm shift from individuals to communities. As a result Community Medicine emerges as an important branch of medicine concerned with the health of populations and prevention of disease. It strives to protect and promote the health and well-being of the community through integrated Primary Health Care approaches and community Service at various levels.

MISSION

The mission of Department of Community Medicine is to prepare upcoming doctors to focus on disease prevention and health promotion by addressing social determinants of health and advocating for population health through organized community efforts based on scientific research and knowledge.

VISION

The Department of Community Medicine is committed to provide excellence in education for students pursuing medical career as a profession. The qualified faculty with a broad multidisciplinary approach to public health and clinical issues is facilitating the students towards evidence based learning by conducting research in the community on issues of public health importance.

TEACHING / TRAINING

The Department of Community Medicine at LNMC has adopted different teaching methodologies including Interactive Lectures, Tutorials, Case Based Discussions, Field visits, Problem Based Learning sessions and Research Workshops for students and faculty to promote Evidence Based Preventive Medicine approach in our students and faculty.

The Department has a well-equipped museum and latest soft wares for teaching Public Health methods to medical students. Department also teaches students regarding Research methodology. The students are trained to conduct Medical and Clinical research under the guidance of trained supervisors. Along with it the department also facilitates the faculty in various research projects. Thus provides conducive environment for promotion of health and allied sciences research.

Forensic Medicine

INTRODUCTION

The Department of Forensic Medicine is responsible for teaching forensic medicine and toxicology and ethics at the undergraduate level according to the latest MBBS curriculum prescribed by Pakistan Medical & Dental Council.

The main objective is to highlight those legal aspects of medical practice which future doctors will be expected to apply knowledge and skill in dealing with medico-legal matters/ issues when required by the court of law and professional medical practice.

SERVICES

This department is well equipped with offices, lecture hall, tutorial room, demonstrator office, serology lab and museum having all types of models and artificial weapons and other facilities for teaching, presentations, discussion and practical training of students, thus imparting the required and up-to- date knowledge.

UNDERGRADUATE EDUCATION

Students are taught about different aspects of forensic medicine which includes Law in relation to medical profession, medical ethics, informed consent, medical negligence, certification of cause of death, medico legal autopsy, recognition and interpretation of mechanical injuries, burn injuries, traffic accidents, deaths from asphyxia, domestic violence, medico legal aspects relating to sexual assault, medico-legal aspects of marriage, pregnancy & delivery, forensic aspects of personal identification, Biometrics, Polygraph, age certification, torture and death in custody, forensic psychiatry, forensic examination of biological fluids, blood & semen stains, trace evidence. In addition to these, the forensic toxicology relevant to diagnosis, identification of poison, management and treatment are part of curriculum. The student learning program has been integrated according to module wise studies. The learning methods used are: Interactive lectures, demonstration, tutorials making use of multimedia. For practical orientation, the students visit ER, Mortuary and National poisoning control center of Pakistan for Medico Legal cases. Students have to be assessed at by the affiliated University accordingly.

RESEARCH

The department is actively involved in research activities.

Department of Health Professional Education

VISION

The Department of Health Professions Education (DHPE) aims to create a national distinct environment of quality education for a diverse group of healthcare educators. The department will strive for a new generation of healthcare leaders and educators with a commitment to research, excellence, innovation, technology, collaborative practices, and responsiveness to changing environment.

MISSION

DHPE mission is to prepare educators towards adapting dynamic curricula and innovative approaches to teaching, learning, and assessment within the rapidly changing healthcare landscape along the entire continuum of health professions education.

LIAQUAT NATIONAL MEDICAL COLLEGE (LNMC)

The DHPE supports LNMC in preparing competent medical graduates who will demonstrate responsiveness to the growing needs of the profession, and evolving societal expectations. DHPE faculty work closely with the Medical College to implement integrated curricula, small group case-based integrated learning, online learning, and reliable online and on-site examinations. DHPE conducts a Study Skills module for MBBS first-year students to help them overcome the academic pressures of medical studies. DHPE is the lead department for Communication Skills longitudinal course development for medical students. DHPE encourages small group active learning strategies such as forum theatre, individual and group presentations for meaningful development of cognitive and communication skills. DHPE also develops study guides that facilitate both students and faculty.

Moodle (Learning Management System) as a digital platform is being used at LNMC to facilitate, the creation, delivery, and management of educational content. The faculty can upload educational resources on Moodle and the students can access learning materials at their own pace.

Faculty Development Unit provides educational support to medical and allied health faculty on curriculum planning & development, learning strategies, online teaching, and assessment. Certificate in Health Professions Education (CHPE) course promotes evidence-based teaching and assessment practices through trained faculty.

The Examination Unit (EU) is equipped with MCQ bank software for submission and maintenance of updated questions as well as with Optical Mark Reader for prompt scoring and result analysis.

Online examinations are also conducted at LNMC using Moodle as a resource. This enables secure and fair assessment delivery which enhances the efficiency, accuracy, and effectiveness of assessments at LNMC

DHPE team includes educators with commitment and expertise in health professions education in areas such as leadership, research, integrated curriculum, student-centered learning, simulation, and assessment.

Pathology

INTRODUCTION

The Department of Pathology is a multi-disciplinary department consisting of Histopathology, Microbiology and Clinical Pathology on the Medical College side.

The Medical College Section consists of fully equipped and air-conditioned laboratories, a large museum with a wide range of mounted pathology specimens, a teaching microscope with attached camera and large LCD screen as well as several tutorial rooms for small group teachings.

UNDERGRADUATE TEACHING

Undergraduate teaching of Pathology is in the form of lectures, practical sessions and small group tutorials, as per the guidelines of PM&DC. Regular assessment of the students is carried out. Purposes built separate laboratories are available for practical demonstrations.

The clinical lab is ISO 9001: 2008 certified and participates in EQA programs by College of American Pathologists, to assure quality. Equipped with high-tech latest equipment's and qualified experienced staff, it handles more than a million specimens every year and works round the clock.

Qualified teaching faculty with vast experience and training, for each sub specialty is present. Continuous assessment of the students is performed at regular intervals and a close eye is kept on their performance throughout the year.

RESEARCH

Research is actively encouraged and conducted with participation in national & international conferences, paper presentations as well as publications in reputable local and international journals. Postgraduate training is an integral part of the department, and so far more than 40 trainees have cleared their FCPS in various disciplines of Pathology.

Pharmacology

OVERVIEW

Welcome to the Department of Pharmacology at Liaquat National Medical College, the cornerstone of our commitment to excellence in medical education and research. Our department stands out for its comprehensive approach to pharmacology, blending rigorous academic instruction with cutting-edge research and practical experience. We are dedicated to preparing students to understand and apply pharmacological principles that are crucial for effective medical practice and advancing healthcare.

ACADEMIC EXCELLENCE

Our department boasts a distinguished team of faculty members, including leading and experienced educators with diverse academic backgrounds. The faculty includes a Ph.D. professor, an associate professor, two assistant professors holding an MPhil degree pursuing PhDs, and lecturers / demonstrators holding an MBBS degree, many of whom are engaged in ongoing research and advanced studies. This diversity ensures a rich learning environment where students benefit from a range of expertise and perspectives. Our teaching philosophy emphasizes a deep understanding of pharmacological concepts, critical thinking, and the application of knowledge in clinical scenarios rather than rote memorization.

UNDERGRADUATE PROGRAM

The undergraduate curriculum in pharmacology is designed to provide students with a solid foundation in the science of drugs and their effects on the human body. Our teaching methods include interactive lectures, clinical case discussions, and small-group tutorials. We utilize innovative tools such as concept maps to reinforce learning and encourage students to connect theoretical knowledge with practical application. Educational materials and lecture recordings are made available through our Learning Management System (LMS), ensuring that students have access to resources and can review content at their own pace.

FACILITIES AND RESEARCH

Our department is equipped with state-of-the-art facilities that support both teaching and research. The pharmacology laboratory features advanced equipment for conducting experiments, including drug testing on animal models, and a power lab for practical demonstrations. These facilities provide students with hands-on experience and a deeper understanding of pharmacological mechanisms and drug interactions. Research is a key focus of our department, with faculty and students actively engaged in projects aimed at exploring new therapies, understanding drug efficacy and safety, and contributing to the broader scientific community.

MENTORING AND SUPPORT

We are committed to the personal and professional growth of our students through a structured mentorship program. Faculty mentors provide guidance, support, and insights into both academic and career development. This program is designed to help students navigate their educational journey, foster their research interests, and prepare for successful careers in pharmacology and related fields.

Physiology

INTRODUCTION

The faculty of Physiology comprises of highly qualified and skilled medical professionals holding appropriate qualifications and experience recognized by National and International regulatory authorities including Pakistan Medical and Dental Council, College of Physicians and Surgeons, Pakistan and Higher Education Commission, who are qualified to undertake undergraduate as well as postgraduate training.

SERVICES

The department offers a congenial, comfortable and well equipped working environment for faculty as well as for students which includes air conditioned offices, lecture halls, physiology laboratory and seminar rooms with modern audio-visual equipment and latest teaching aids. The most advanced equipment and devices for practical physiology are available including the Power Lab which is a data acquisition system with sophisticated attachments. Its typical applications include teaching and research across human and animal physiology.

UNDERGRADUATE TEACHING:

The undergraduate teaching strategies utilize contemporary teaching methodologies including formal lectures, tutorials, small group discussions, Interactive Lectures, practical, power point presentations, Priming, Flipped Classroom, Role plays, Case based learning and Team based learning sessions to improve students' understanding of the basics as well as clinical aspects of the subject comprehensively. The department performs assessment and evaluation routinely to help prepare the students for professional examinations providing encouraging environment to nurture their capabilities.

POSTGRADUATE TEACHING:

The department is running a postgraduate programme of training in FCPS physiology which is unique for the institution with approval of college of Physicians and surgeons of Pakistan.

M.Phil. and PhD thesis review and defense of thesis is also being supervised and examined.

RESEARCH

It is our goal to combine a wide spectrum of research expertise and experimental techniques in order to foster an ideal training program for the advancement of the knowledge in human physiology. This is appreciated by the positive feedbacks from our students and it is a great source of inspiration for us that our students excel in undergraduate as well as post graduate examinations with flying colors.

Accident & Emergency

INTRODUCTION

The Department of Emergency at Liaquat National Hospital is providing a variety of services to its patients. Having all the facilities of any modern tertiary care hospital. It is more than capable to deal with every type of medical, surgical and trauma related emergency.

SERVICES

The Department provides services by Consultants, Senior Registrars, Registrars and Medical officers round the clock, dealing with all types of major and life threatening emergencies with expertise and dedication.

Our mission is to provide quality emergency care to the patients in a friendly yet professional environment.

The Department is staffed with skillful doctors, nurses and dedicated team of ancillary services. It has all kinds of investigations and treatment facilities available, under one roof.

Our departmental layout consists of Acute, isolation area, Male and Female bays, divided according to patient condition based on Triage. We are supported by a wide range of services, including round-the-clock Cardiac Catheterization, Radiology, Laboratory as well as Minor Procedure facilities. The emergency patients have the services of all specialty doctors present in the hospital.

We also offer dressings and stitching of the wounds, fixation of fractures, in our minor Procedure room at all times of the day.

UNDERGRADUATE AND POSTGRADUATE TEACHING

The Department has a regular teaching program for under and post graduate students and provides a chance for hands-on training in acute management of critically ill patients.

RESEARCH ACTIVITIES

The Emergency Department has multiple ongoing research projects with the aim of producing local data that will be beneficial in better patient management.

ACHIEVEMENTS

The Emergency Department has always rendered its services with complete dedication and expertise during times of disaster in the city and prides itself in saving many lives, under adverse circumstances.

Department is now recognized by CPSP for Emergency Medicine training. The departmental is also ISO certified 9001: 2015. The department had been a part of hospital Covid team and handled patient effectively in pandemic situation with training and teaching of doctors and staff according to infection control policy for Covid19 patients.

Anesthesiology

INTRODUCTION

Department of Anesthesiology, Critical Care & Pain Management provides high-quality, evidence-based care for a wide variety of surgical, therapeutic, diagnostic and interventional procedures. Our faculty provides safe & efficient non-operating room anesthesia (NORA) care at pediatric cardiac Cath lab, adult Cath lab, CT, MRI and VIR suites, ultrasound room, lithotripsy, and endoscopy suites. The faculty has extensive perioperative medicine experience, expertise in airway management, intravascular access, resuscitation, management of critically ill patients, and acute and chronic pain management. Throughout the year, a large number of high risk challenging patients successfully undergo complex surgical procedures both under General and Regional anaesthesia.

SERVICES

- Anaesthesia clinic: The Anaesthesia clinic provides evaluation and treatment plans to preoperative patients to ensure that patients are managed well during their perioperative period. Our objectives are to reduce perioperative risk through evidence-based best-practice preoperative evaluation and treatment. All patients expected to undergo anaesthesia are evaluated for co-morbid conditions that increase perioperative risk, preoperative interventions are initiated to minimize risk of complications. Patients are educated to optimize their perioperative care and reduce post-operative complications particularly pulmonary and cardiac complications.
- The department has state-of-the-art operating rooms equipped with modern anaesthesia workstations, facilities for invasive monitoring, advanced airway management (video laryngoscopy, fiberoptic bronchoscopy), monitoring for depth of anaesthesia and quantitative neuromuscular monitoring caters for different anaesthetic requirements for general surgery, orthopedics, urology, vascular, otolaryngology, head & neck, pediatrics, plastic and reconstructive, fasciomaxillary, thoracic, cardiac (both adult and pediatric), neurosurgery, obstetrics & gynecology and trauma surgery.
- Post-anaesthesia care unit (PACU): All patients are admitted to PACU following anaesthesia and surgery where they are managed until they regain full consciousness, and their postoperative nausea and vomiting (PONV) and postoperative pain are under control. Patients are not discharged until vital signs have stabilized and PONV and pain are under control. The PACU is manned by trained and skilled staff who continue the same monitoring that was being carried out in the operating room.
- A multidisciplinary team made up of intensivist (members of our faculty), surgeons, other consultants, trained ICU nurses, pharmacists, and physical therapists manage medical and surgical critically ill patients, round-the-clock in surgical intensive care units that are provided with state-of-the-art equipment.
- Our Acute Pain Service team is dedicated to minimizing postoperative pain and assisting with early ambulation and rehabilitation of surgical patients. Our specifically trained faculty members with perioperative pain management expertise, anesthesia residents and a pain nurse make up the team. In order to minimize postoperative pain, the acute pain team employs a multimodal strategy that includes combinations of various drugs, epidurals, ultrasound-guided peripheral nerve blocks, and state-of-the-art patient-controlled analgesia (PCA) pumps.

- Chronic Pain Clinic: Pain is a complicated and often debilitating medical condition that can have a major impact on quality of life, physical function and mental well-being. Our pain specialists offer a comprehensive range of treatments for patients with chronic pain including epidurals, facet joint injections, peripheral nerve blocks, lumbar & stellate ganglion blocks and celiac plexus block for conditions like backache, cancer pain, ischemic limb pain, complex regional pain syndromes, neuralgias and neuropathic pain.

UNDERGRADUATE TEACHING

Our faculty members regularly teach undergraduate and postgraduate students. Regular lectures are scheduled for final year students and they are rotated in our department as part of their training.

RESEARCH

Faculty and residents present papers both in national and international conferences of anesthesia from time to time. CMEs, workshops and public awareness programs are also arranged periodically. Research is also conducted on various topics by trainee residents supervised by seven supervisors in the department. Students are also encouraged to do research.

ACHIEVEMENTS

- We run a structured residency program, for FCPS in Anesthesiology. To date, our 128 trainee (MCPS, FCPS) have successfully passed their exams after completing the training who are now serving different hospitals of the country as well as abroad.
- Anesthesia department is ISO 9001:2015 certified

Breast Surgery

INTRODUCTION

The Department of Breast Surgery has been dedicated to providing exceptional care and support for patients with breast-related health concerns. With a focus on innovation and comprehensive treatment, we strive to enhance patient outcomes and improve quality of life. Our department is a renowned, high-volume breast surgery center in the city, specializing in a wide range of benign and malignant conditions. With over 1,000 new breast cancer cases annually, our department delivers advanced care through the expertise of our skilled surgeons.

UNDERGRADUATE TEACHING AND TRAINING

The Department of Breast Surgery at Liaquat National Hospital and Medical College offers a comprehensive and rigorous undergraduate training program designed to equip medical students with the knowledge and skills necessary to excel in the field of breast surgery. Our dedicated faculty is committed to delivering high-quality education to undergraduate medical students.

CURRICULUM

The undergraduate curriculum in breast surgery includes a combination of didactic lectures, clinical rotations, and hands-on training. Students have the opportunity to learn about:

- Anatomy and physiology of the breast
- Breast development and pathology
- Diagnosis and staging of breast cancer
- Surgical techniques for breast cancer treatment
- Breast reconstruction options
- Oncologic management of breast cancer
- Supportive care for breast cancer patients

CLINICAL ROTATIONS

Students participate in clinical rotations in the Department of Breast Surgery, where they observe and assist in various procedures, including:

- Biopsies
- Lumpectomies
- Mastectomies
- Breast reconstruction surgeries
- Sentinel node biopsies
- Axillary lymph node dissections

HANDS-ON TRAINING

Students have the opportunity to gain hands-on experience through simulation training and getting scrubbed along with the faculty and residents. This will help them develop essential surgical skills and improve their confidence in the operating room.

RESEARCH ACTIVITIES

The Department of Breast Surgery is actively involved in research aimed at advancing knowledge in breast health, treatment options, and surgical techniques. Our faculty and students collaborate on various research projects, contributing to a growing body of literature. We encourage student participation in research initiatives to cultivate critical thinking and analytical skills essential for their future careers.

COMMUNITY OUTREACH

We believe in the importance of community education and outreach. We participate in various community events and initiatives to raise awareness about breast cancer and promote early detection.

ADVANCED FELLOWSHIP PROGRAM

The Department of Breast Surgery offers a prestigious 2-year-advanced postgraduate fellowship program in breast surgery affiliated by College of Physician and Surgeons Pakistan. This program is designed to train highly skilled surgeons who can provide advanced care for patients with breast-related conditions and being awarded fellowship degree after the completion of training and exam.

ACHIEVEMENTS

Our department is a hub for educational excellence and innovation in breast surgery. We regularly host awareness sessions, symposia, and continuing medical education (CME) events featuring leading experts. These initiatives are designed to enhance the skills of healthcare professionals and disseminate the latest advancements in breast surgery.

Cardiac Surgery

INTRODUCTION

The Department offers a very high standard of diagnostic and therapeutic facilities. It is recognized as one of the premier centers for treatment of Cardiac Surgery diseases and ailments in the city. All types of Adult and Pediatric Cardiac surgery procedures are performed here. The department has performed a large number of complicated and complex heart operations. On an average over 300 procedures are performed annually.

SERVICES

In addition onsite, Laboratory, Blood bank, Angiography, Echocardiography, Exercise tolerance testing (ETT), Thallium stress test, CT scanning, MRI, Carotid Doppler, Dialysis, ultrasound, diabetic care and physiotherapy services round the clock which not only saves the patient and their families from running around but at the same time speaks of the multi specialization structure of the hospital and make this unit a very safe place for all sort of Cardiac Surgery procedures.

UNDERGRADUATE AND POSTGRADUATE TEACHING

The students of LNMC rotate through this department. During their stay along with bed side teaching, they are encouraged to attend OT to witness bypass and Mitral / Aortic Valve replacement operations. The department is recognized for training by the College of Physician and Surgeons Pakistan (CPSP) for postgraduate trainees.

RESEARCH

The department encourages research and has published various papers in PM&DC recognized journals.

Cardiology

INTRODUCTION

The department of Cardiology is providing best Cardiac Services to our people. Not only people of Pakistan but also people from adjoining Countries also visited and take advantage of the best Service provided in our department. The department has wide range of Cardiac related facilities which meet the requirement of our patients.

FACULTY

The department of Cardiology has adequate number of faculty members. The faculty includes both invasive and non-invasive Cardiologist. Along with Adult Cardiology Services, our hospital also provide Paediatric Cardiology Services with full time dedicated Cardiologist and Cardiac Surgeon. Adult Cardiac Surgery is available in our hospital with full time dedicated Cardiac Surgeon.

FACILITIES

24 hour emergency service for Cardiac patients is available in our emergency department without any break. From Monday to Saturday, Cardiac OPD service is available in both morning and afternoon shifting. Evening executive OPD is also available most of the days. We have the best Coronary Angiography machine in our Cath Lab. We provide the best coronary angiography and angioplasty (PCI) services to our patients. Temporary and Permanent pacemaker are implanted in our Cath Lab. Paediatric and Adult Congenital Heart Disease procedures are performed here. For our emergency patients, we provide 24 hour services of Coronary Angiogram, PCI and Cardiac Surgery. Our non-invasive department is equipped with high quality echocardiography machines, ETT services, 24 to 72 hours Holter Monitoring, Ambulatory BP pressure recording, Tilt Table Test and Myocardial perfusion scan (MPS). Our echo department perform high quality echocardiogram, and other echo related procedure like Dobutamine Stress Echo (DSE), Transesophageal echo (TEE) and perform Pericardiocentesis.

CARDIOLOGY TRAINING

The department of Cardiology is recognized by College of Physician and Surgeon of Pakistan (CPSP) for post graduate training. A large number of doctors have successfully passed the FCPS and providing the best services in the different hospitals. Our department provides best training environment for both undergraduate and postgraduate students.

Dermatology

INTRODUCTION

Department of Dermatology, Liaquat National Hospital & Medical College comprises of three out patients clinics, which are being run on daily basis. Both walk in and appointment patients are facilitated. Patients are referred from dermatology reviewed from all other departments of the hospital.

SERVICES

The Department is offering certain essential procedures for better services i.e. intralesional steroids injection for Keloid, Alopecia Areata. Elector cautery for viral warts. Cryo therapy or liquid nitrogen gas spray is used for viral Infections like Molluscum Contagiosum and warts. Chemical cautery with the help of trichloro acetic acid touches for Xanthelasma Patients, PRP for all types of Alopecia and Acne scars, melisma. UVB and UVA for many skin conditions like Psoriasis, Vitiligo, Atopic Dermatitis and cutaneous Malignancies.

LNH also offering Aesthetics procedure like PRP, Microneedling, Laser Hydro-facial, skin Rejuvenation, Skin peels, etc.

UNDERGRADUATE TEACHING

- Teaching activities are also performed within the out patients clinics and through ward rounds.
- At the medical college lectures and tutorial are held.
- Seminars and workshops are also arranged for the students.
- Two months rotation of Medicine and Pediatrics Residents in dermatology department which includes their teaching and enhancing their clinical skills.
- Rotation of undergraduate students for two weeks in dermatology department and their theory and practical exam at the end of the rotation.
- Conduction of module of dermatology of fourth year students of medical college.
- Clinical teaching in the outpatients department.

RESEARCH

The Department understands the importance of research and provision of local data and is actively involved in research activities.

Diabetes, Endocrinology & Metabolism

INTRODUCTION

Endocrinology is rapidly growing specialty worldwide. The Endocrine System consists of a collection of glands that control basic body functions such as metabolism of sugars, fats and proteins. Endocrinology encompasses wide medical disorders including diabetes mellitus, lipid disorders, obesity, hypertension, pituitary disorders, thyroid and parathyroid disorders, adrenal (cortisol deficiencies and excess), diabetes insipidus and inappropriate release of vasopressin, associated with thirst disorders and electrolyte imbalance (abnormal sodium and other electrolytes), problems of puberty, calcium and bone disorders (osteoporosis, osteomalacia, Vitamin D disorders), growth disorders (short stature, abnormal growth including acromegaly), female hormonal issues (menopause, Hormone Replacement Therapy, Polycystic Ovarian Syndrome), gonadal and reproductive disorders including male infertility.

SERVICES

With the help of specialized diabetes educationist and dedicated nutritionists, all patients are provided with diabetes education and a diet plan tailored to their needs and capacities. General endocrine clinics are held daily in the morning and afternoon. Specialized clinics are also held for Obesity, Growth, Gestational Diabetes and Thyroid disorders.

There are three full time Consultants (Dr Aqiba Sarfraz, MBBS, MCPS, FCPS (Head of Department), Dr Ali Asghar, MBBS, MRCP (UK), FACE (USA) and Dr Muhammad Owais Rashid, MBBS, FCPS (Medicine), FCPS (Endocrinology) in the department.

UNDERGRADUATE & POSTGRADUATE TEACHING

The department is actively involved in under-graduate and post-graduate training including lectures, CME activities, clinical and bedside teaching.

E.N.T Head, Neck Surgery

INTRODUCTION

The Department of ENT Head & Neck Surgery is a major tertiary referral unit in Pakistan. We have highly qualified consultants and trained junior staff. Emphasis is on providing quality care to our patients. We deal with full range of ENT disease including head & neck cancer.

SERVICES

The ENT ward is staffed by trained personnel. The ward comprises of semi-private/ private rooms. We provide outpatient services six days a week. Patients with ENT problems are managed in a planned and coordinated manner for quick establishment of diagnosis and early treatment. We work in coordination with medical and radiation oncologist, reconstructive surgeon and pathologist to formulate a multi-disciplinary comprehensive management plan for our oncology patients.

Our services cover a wide spectrum of ENT, salivary glands Head & Neck cancer surgeries. We have started neonatal hearing screening of all the babies born at Liaquat National Hospital. This is the first services of its kind in Pakistan. We also provide audiology services by a trained audiology technician.

UNDERGRADUATE TRAINING

The ENT faculty is highly focused and motivated in providing excellent undergraduate teaching. The goal is to train our medical students is to make medical students- responsible, dedicated, competent and caring doctors. The department encourages students to participate in research and academic activities.

We have four weeks and six week rotation in 3rd and 4th year respectively, during that we make student understand the basic of diagnostic and therapeutic tools to diagnose ENT related disease. We conduct interactive assessment at the end of their rotation.

RESEARCH

The Department is keenly interested in Research activities.

Family Medicine

INTRODUCTION

The Department of Family Medicine was established in March 2016, and is recognized for its comprehensive, accessible and affordable primary health care services.

SERVICES

Our team of consultants and Specialist Family physicians practice a bio-psycho-social model of care and provide holistic health care to patients. In addition, to educating our patients on disease prevention, our doctors perform risk assessments and screening tests for early identification of diseases. We deal with a wide range of medical problems, acute as well as chronic illnesses encountered by adults, women, children, and the elderly population. The scope of our services follows the "hub and scope model," with clinical facilities located at the main hospital campus, senior citizens' primary care unit, employee health clinic, and outreach medical services located at five different locations in Karachi, including Shah Faisal Colony, Gulistan-e-Jauhar, Gulshan-e-Iqbal, Nazimabad, and Naseerabad. In addition, through home visits, Our Family physicians make health care more accessible to those patients who cannot visit our clinics, especially the elderly and bed-bound patients suffering from chronic diseases or disabilities.

UNDERGRADUATE TEACHING

The Family Medicine department places great emphasis on teaching and training medical students. A foundational introduction to the field of Family Medicine is provided, highlighting its role within the healthcare system. Students' clinical rotations are organized to develop an understanding of the principles of Family Medicine and primary care. Through our faculty role modeling, students learn to apply the bio-psycho- social model, continuity of care, empathy, and compassion to manage their patients. We strive to prepare our medical graduates to effectively deal with common medical problems encountered at the primary care level in the community.

POST GRADUATE TRAINING

The College of Physicians and Surgeons Pakistan recognizes the department for FCPS and MCPS training in Family Medicine. Our fellowship training aims to prepare Primary care specialists and academic leaders who can offer the community comprehensive, cost-effective preventive, curative, and rehabilitative care. In collaboration with World Health Organization the department is offering a one-year postgraduate certificate program in Family Medicine. This program provides practicing GPs with a unique opportunity for continuous professional development through a flexible hybrid learning environment.

RESEARCH

Department of Family Medicine promotes a culture of research and evidence-based practice in primary care. Our faculty is involved in many research projects and contribute as a member of the editorial board for Liaquat National journal of primary care, which is indexed at Google Scholar, Dimensions-Digital Science (UK), CORE (UK), and Directory of Open Access Journals (DOAJ), SCOPUS and recognized by the Higher Education Commission Pakistan (HEC).

Gastroenterology

INTRODUCTION

The Department of Gastroenterology is housed in the Syed Wajid Ali Shah Complex of LNH. The department has seven full time faculty members and a Senior Registrar.

SERVICES

It comprises of dedicated ward providing in-patient care. There are 10 dedicated OPD rooms which are run by the highly qualified consultants on daily basis in which any patient with liver or gastrointestinal problems may walk in with and / or without prior appointment.

Our Endoscopy Suite has four rooms with state of the art equipment's. It provides facilities for broad range of diagnostic and therapeutic procedures including Esophago Gastro Duodenoscopy (upper GI endoscopy), Colonoscopy (lower GI endoscopy) and Endoscopic Retrograde Cholangio Pancreatography (ERCP). We have our own fluoroscopy in the endoscopy suite.

We also have Endoscopic Ultrasound facility available. We have dedicated women endoscopy services also. State of art Fibroscan machine available in OPD. UBT (Urea breath test) for Hpylori detection in also available in OPD.

UNDERGRADUATE AND POSTGRADUATE EDUCATION

Apart from clinical services a lot of focus is on academic and research activity. The department has full recognition from the College of Physicians and Surgeons of Pakistan for three years fellowship program in gastroenterology and the selection process is highly competitive. LNH is one of the largest Gastroenterology training centers in Pakistan.

The Students of Liaquat National Medical College regularly rotate with each faculty for two weeks. During their rotation, they attend OPDs do ward rounds with consultants and observe and interpret endoscopic findings.

At the end of their rotation, assessment of students is done through MCQs based test. Their attendance and assessment marks are marked on regular basis and signed by the faculty responsible.

ACHIEVEMENTS

It is an honor of our department that our trained fellows are accomplished gastroenterologist and are working in the different hospital in Pakistan and abroad.

Residents & students are actively involved in research projects, which are published and presented nationally and internationally.

General Medicine

INTRODUCTION

The Department of Medicine is the primary division of LNH&MC, offering essential services to patients with medical issues. We conduct daily outpatient clinics, with over 24,000 patient visits each year, ensuring thorough attention and appropriate investigations for effective management. Inpatient care is provided in cost-effective male and female wards, specialized wards, and executive wards, all featuring high-quality nursing support. For patients needing intensive care, we have a fully equipped Medical Intensive Care Unit (MICU) that offers comprehensive investigation and treatment in critical situations.

We have also established Geriatric services for individuals aged 65 and older, which include initial evaluations, neurocognitive screenings, psychological support, and physiotherapy assessments. Additionally, we provide home visits in collaboration with our home health services department.

UNDERGRADUATE TEACHING

The Department aims "to prepare exceptional doctors, disseminate knowledge, and uphold the values of the medical profession." We conduct regular teaching, training, and assessment to meet these goals. Third, fourth, and final year MBBS students receive instruction through lectures, tutorials, bedside teaching, and clinical discussions, rotating through outpatient departments and medical wards. This department is recognized by the PM&DC for providing house job training to recent graduates.

We play a crucial role in the training of both undergraduate and postgraduate students under the guidance of our highly qualified faculty. Our postgraduate training is well-regarded nationally, and we also facilitate candidates, who are appearing in IMM Medicine and FCPS II Medicine examinations by organizing hands-on workshops. The department is accredited by the College of Physicians and Surgeons of Pakistan (CPSP) and the Royal College of Physicians for four years of FCPS and MRCP training.

RESEARCH

The department actively organizes research activities and workshops to encourage students to engage in research and publication.

General Surgery

INTRODUCTION

Serving the community for half a century, the Department of General Surgery is committed to impart high quality service to its clientele. With over 5000 surgical procedures/year, we form a vigorous workforce ensuring the delivery of comprehensive surgical care.

UNDERGRADUATE TEACHING AND TRAINING

The highly trained full time faculty is totally committed to provide undergraduate education. From the inception of the medical school till the implementation of the integrated modular system the Surgery department is deeply involved in student's academic development. From large lectures to small tutorial groups the students are intensely tutored and receive individual attention. During their clinical rotation, they are attached to faculty members who take great interest in sharpening their clinical acumen, enhancing analytical skills, organizing tests and arranging feedback sessions. Students exposure to the clinical environment is strengthened by the large volume and variety of patients managed by the highly skilled faculty in the state of the art way. They are nurtured to become competent professionals. The department is also involved in Postgraduate Teaching and Training.

RESEARCH ACTIVITIES

The Department of General Surgery actively participates in research activities related to general surgery, breast surgery and medical education. So far, department has produced multiple good quality publications and many are in the pipeline. The students are encouraged by faculty members to enroll in supporting research projects in order to develop their research acumen.

ACHIEVEMENTS

The department is the forerunner and the hub of educational activities for the entire hospital. Multiple medical education workshops are regularly conducted by the faculty to train the hospital faculty to impart quality education. In addition symposia with local and foreign speakers, workshops and CMEs are a regular feature.

Nephrology

INTRODUCTION

The Division of Nephrology and Hypertension cares for patients with a diverse range of kidney diseases through inpatient consult service, ward/transplant service, outpatient clinics and hemodialysis facilities. It has gained recognition for its expertise in difficult to manage and complicated cases.

SERVICES

Nephrology ward includes a separate male ward, female ward and private wing. The department has its own intensive care unit with ventilator support and separate step down unit. 24 hours emergency care is provided to all the patients.

HAEMODIALYSIS UNIT

The Department of Nephrology comprises of a separate unit of Hemodialysis, which provides round the clock service, seven days a week for chronic hemodialysis as well as acute emergency dialysis. Dialysis unit is staffed with well-trained nurses and technicians. There are dedicated units for hepatitis B & C positive patients. Peritoneal dialysis is also offered in our unit.

ACADEMIC ACTIVITIES

Educational activities in the division, ranges from teaching medical students to providing advanced training for fellows. The Renal Fellowship Program is aggregated with CPSP and is comprised of comprehensive training program that covers all” aspects of clinical nephrology and actively involves the fellows in research. The division’s faculty also provide core curriculum to residents and students, and participate in continuing medical education (CME) programs sponsored by Liaquat National Hospital & Medical College. By the grace of Allah 42 nephrology fellows have completed their training up till now and 24 fellows have achieved the success in FCPS part II nephrology exam and awarded the FCPS nephrology degree.

Morning rounds are conducted daily, which includes bedside clinical teaching, case discussion and nephrology updates and topic reviews. There is monthly morbidity and mortality meeting, which reinforce better patient service. We have arrange monthly PSN meeting in which all nephrology hospital participate actively.

RESEARCH

Research activities are mandatory and are supervised by Head of the Department. There has been multiple research papers published and multiple ongoing projects in progress by the faculty of Nephrology.

Neurology

INTRODUCTION

The Neurology Department of Liaquat National Hospital runs outpatient clinics and also has a fully equipped Neurophysiology laboratory which performs nerve conduction studies and electromyography (NCS/EMG), electroencephalogram (EEG) and evoked potentials (EPs).

SERVICES

The outpatient clinics are run by consultants and his team of residents and medical officers. Every patient visiting the clinic is seen by the consultants personally.

Neurology department is staffed with five qualified neurology consultants who are actively involved in patients care and academic activities.

The inpatient services include a stroke unit which is a high dependency unit which caters for patients with acute neurological problems.

UNDERGRADUATE TEACHING

Undergraduate teaching is in the form of regular bedside teaching sessions and didactic class's lectures of 3rd year, 4th year & 5th year as per guidelines of PM&DC. Regular assessments of all 3 clinical years are done on regular basis at the end of their posting. Undergraduate students keep records in log books, log cards, journal & grade book.

Teaching sessions are conducted regularly & CMEs are conducted from time to time for of general physicians and the public.

RESEARCH

Realizing its importance the department is involved in propagating scientific research and publications and actively participate in national and local conferences.

Neurosurgery

INTRODUCTION

The Department of Neurosurgery is a state of art department for the surgical and non- surgical evaluation, treatment and training of the full range of adult nervous system diseases. The Neurosurgery Department provides most advance specialized patient care in a compassionate and accommodating manner.

SERVICES

The Neurosurgery department is the busiest and technologically advanced unit with the high patient flow. We have morning, afternoon and evening OPDs with two Neurosurgical operation theaters that are available 24/7. The department has high dependency unit beds and isolation room. There are 8 Neuro-Spinal surgeons in this department, backed by a team of experienced neuroradiologists, intensivists, and neurophysicians. The highly advanced imaging and technical facilities at Liaquat National Hospital allow for a very successful outcome of surgery.

UNDERGRADUATE AND POSTGRADUATE TEACHING

The Department of Neurosurgery has organized various CME's, public awareness programs and cadaver courses on various topics including spine, Image guidance, Endoscopy, Neuro-Anatomy and skull base surgery. We have also organized and conducted more than 250 webinars on operative neurosurgery, basic and advance neurosurgery, Neuro-Endoscopy and Neuro-Anatomy.

We are undertaking undergraduate lectures, tutorials & rotation. We encompass clinical electives for medical students from all over Pakistan to experience and indulge the state of the art facilities neurosurgery offers at LNH&MC. Due to the growing interest of young doctors in neurosurgery, we have established a "Pakistan Neurosurgery Students Society" that provides a platform for medical students to engage with us and stay inspired.

RESEARCH

The Department is involved in research activities. We have publications in renowned neurosurgical journal. Department has separate fund to promote research activities.

Obstetrics & Gynecology

INTRODUCTION

The Obstetrics and Gynecology Department of Liaquat National Hospital accepts all kinds of obstetrical and gynecological emergencies. The department operates on round the clock basis. Its clinical faculty consists of six full time consultants, six part-time consultants, three postgraduate senior registrars, three senior medical officers, sixteen residents and two medical officers.

All patient care locations are equipped with modern maternal and fetal monitoring facilities. Approximately 2,600 to 2,800 deliveries are conducted annually along with the outpatient workload of 50,000 to 55,000 patients per year.

Sub-specialties of the department include sub fertility, endoscopic surgery, urogynaecology and gynecological oncology.

UNDERGRADUATE TEACHING

Undergraduate teaching is in the form of lectures, tutorials, small group clinical discussion of 3rd year, 4th year & 5th year as per guidelines of PM&DC. Regular assessments of all 3 clinical years are done at the end of posting by theory examination, clinical examination & OSCIE / OSPE. Undergraduate students keep records in log books, log cards, journal & grade book, and participate in small research projects.

RESEARCH

The Department is also active in research & publications. We have collaborated with two international studies with London School of Hygienic and Tropical Medicine (UK) on “Woman Trial” for Postpartum Hemorrhage. Trial results are now published in Lancet (April, 2017 issue), CORONIS trial results also published in Lancet. More than eight synopses approved and studies are ongoing in the department.

ACHIEVEMENTS

1. ISO recertification.
2. Establishment of sub-specialties.
3. Publication in International Journals, British Journal of Gynecology and International Journal of Gynecology, research during this year.

Oncology

INTRODUCTION

Welcome to the Oncology Department at Liaquat National Hospital where we are committed to providing comprehensive, compassionate care for patients battling cancer. Our multidisciplinary team of experts utilizes the latest advancements in research, technology and treatment to deliver personalized care specific to each patient. The department is equipped with state of the art technology and also provides effective and quality training to undergraduate students and post graduate trainees. Medicine residents, interns and medical students are rotated in Oncology department as part of their training programme.

SERVICES

COMPREHENSIVE CANCER CARE

The department offers services for cancer management to all disciplines of medicine, surgery, gynecology, paediatrics, nephrology, urology and dermatology. Department consists of general and private wards for admitted patients along with day care facilities for patients on chemotherapy. Department staff comprises of oncology consultants, senior registrars, registrars and residents.

Tumor Board Meetings are conducted regularly by the department where multi- disciplinary teams discuss difficult cases of cancer and treatment plans are finalized.

UNDERGRADUATE TEACHING

The Department offers an active training programme and provides excellent opportunities for students and postgraduate trainees. Regular teaching sessions and didactic classes are conducted in the form of lectures, tutorials, small group clinical discussion of 3rd year & 5th year as per guidelines of PM&DC. Regular assessments of each clinical year are conducted at the end of posting.

During their rotation, students and postgraduate trainees attend OPDs, ward rounds, and have interactive sessions about common oncology issues and their management. The department also has a monthly journal club to remain updated on latest treatment modifications. It has been recognized by CPSP for postgraduate training in Oncology.

At Liaquat National Hospital, regular CME activities are arranged by the department to educate young doctors about the recent advances and changing paradigm in cancer treatment.

RESEARCH

The Department is involved in research regarding new treatment and epidemiology of cancers. It encourages students to do the same and undertake publications in peer reviewed journals.

PATIENT EDUCATION AND SUPPORT:

We believe in empowering patients through education. Our team provides screening clinic services to people who are at increased risk of getting cancer. We also provide support to patients through Oncology Support Services and other programs.

COMMUNITY OUTREACH AND EDUCATION:

Our Oncology Department is committed to community wellness. We conduct educational seminars, screening programs, and awareness campaigns to promote early detection and prevention of cancer.

Ophthalmology (EYE)

INTRODUCTION

Liaquat National Hospital is a leading tertiary care hospital in Karachi & the eye department is already providing tertiary care services to its patients. We have 11 fully trained & qualified consultants who are highly acclaimed glaucoma experts, cornea specialists, retina specialists, Uveitis specialists, Paediatric ophthalmologists, refractive surgeons & oculoplastic surgeons, thus all sub-specialties of eye have been covered

We utilize modern tools and carry out advanced tests to accurately diagnose and manage a wide array of eye conditions ranging from dry eye, squint, cataracts, and glaucoma to various retinopathies. We have excellent facilities for cataract surgeries & we use all types of IOL's including monofocal, EDOF (Extended Depth of Focus), multifocal, Trifocals. & Toric lenses.

We also provide round the clock emergency cover for all ophthalmological emergencies such as ocular trauma, foreign body removal, blast injuries and red eye. Being a part of a multidisciplinary tertiary care set up, the Department of Ophthalmology works in close collaboration with Neurosurgery, Maxillofacial surgery, ENT and Plastic surgery to give our patients comprehensive care.

Top of the range Operation Theatre with surgical facilities for all advanced Cataract, Glaucoma, Retina and Squint.

UNDERGRADUATE TEACHING

We have established undergraduate teaching program since 2006 when LNH medical college was started. All Consultants are involved in teaching and are not only specialized in their respective fields but also aware of the adult learning principles. Our teaching programs are learning-oriented in which both teachers and students share responsibility in the learning process.

RESEARCH

Our research activities are led by all Consultants involving Residents, Registrars and students. We collaborate with other departments of the Hospital on some research projects using a multidisciplinary approach.

ACHIEVEMENTS

To our credit we have 23 FCPS, 8 FRCS and 14 MCPS postgraduates. We are also recognized for post fellowship in retina.

Orthopedic Surgery

INTRODUCTION

The Orthopedic Department at Liaquat National Hospital and Medical College is a center of excellence, renowned for its comprehensive academic and clinical services. Under the guidance of experienced faculty, the department has made significant contributions to the medical field, particularly in orthopedic surgery.

ACADEMIC AND TRAINING PROGRAMS:

The undergraduate students from 3rd year onwards during their tenure of orthopedic rotations are given exposure of OPDs, operation theatre as well as ward. Along with which they are also made to attend ward meetings that take place throughout the week.

RESEARCH AND PUBLICATIONS:

Students are actively involved in doing research during their rotation in Orthopedic & currently working on following research projects:

1. Functional outcomes of posterior column fixation in tibia plateaus fractures: A systematic review.
2. Efficacy of Glucosamine and Chondroitin Sulphate vs Bioactive Collagen Peptide in Grade I to 3 knee osteoarthritis: A randomized Control Study.
3. Functional Outcomes of total hip Arthroplasty in young patients: Mid-term outcomes in a tertiary care hospital.

WORKSHOPS AND SEMINARS:

The department is known for organizing multiple workshops throughout the year. These include specialized sessions such as Revision Knee and Hip Arthroplasty, Shoulder Arthroscopy, and Trauma Workshops. These workshops feature both national and international faculty, with a focus on interactive learning and hands-on experience.

Moreover, the department hosts Pakistan Orthopedic Oncology Forum (POOF) events, offering cutting-edge training in orthopedic oncology through live demonstrations and interactive lectures.

DEPARTMENTAL ACHIEVEMENTS:

The orthopedic faculty at Liaquat National Hospital is comprised of highly accomplished professionals. Faculty members have received prestigious honors such as FRCS (Trauma and Orthopedics) and have been invited to participate as international faculty at esteemed conferences around the world, including in Turkey, Nigeria, and Australia. The faculty also contributes to global orthopedic literature, with several publications in reputable journals.

SOCIAL AND EXTRACURRICULAR ACTIVITIES:

Beyond academics, the department fosters a well-rounded extracurricular. They engage such as sports, with the department's cricket team recently winning a major tournament. The department also organizes social events like picnics to promote camaraderie and teamwork among the staff.

Conclusion:

With its focus on education, research, and clinical excellence, the Orthopedic Department at Liaquat National Hospital and Medical College stands as a leading institution in Pakistan's healthcare landscape. It continues to provide state-of-the-art orthopedic care while advancing medical education and research, solidifying its position as a top choice for aspiring orthopedic surgeons.

Paediatric Medicine

INTRODUCTION

The Department of Pediatrics at LNH&MC is primarily dedicated to deliver the quality healthcare to children and to train competent, compassionate and caring doctors through excellence in teaching, patient care and medical research.

SERVICES

The Pediatric Department consist medical & surgical ward, pediatric cardiology ward and HDU.NICU, PICU, medical & surgical HDUs and ER. The services are provided round the clock to a wide variety of patients.

The current Paediatric unit provides a range of sub-specialty services to the patients. Along with general Paediatric other specialized services include:

- Paediatric Cardiology
- Neonatology
- Paediatric Intensive care
- Paediatric Infectious Diseases
- Paediatric Metabolic Diseases
- Paediatric Neurology
- Paediatric Surgery

The Department is supported by an efficient Lab Service and a well-equipped Radiology Department which help in early diagnosis and professional management of patients which is our prime goal.

UNDERGRADUATE / POST GRADUATE TRAININGS

The hospital provides Under & Post graduate training for students in the form of well-structured teaching program. Under graduate Students rotate on scheduled rotations in its state-of- the-art NICU/PICU and specialty clinics for immunizations and detection of life-threatening diseases. Fellowship approved by CPSP in Pediatric Cardiology and Pediatric Intensive care.

RESEARCH ACTIVITIES

Participation in research work is actively in progress by undergraduates and post graduate trainees supervised by faculty members. Several research papers have been published in the journals recognized by PM&DC & HEC.

ACHIEVEMENTS

Department of Paediatric is involved in: CME activities of Pakistan Paediatric Association (PPA), Polio eradication program of Government of Pakistan, acute flaccid paralysis surveillance program of WHO, lactation management program of Government of Pakistan, WHO and UNICEF. LNH is also recognized as a baby friendly hospital. Training of nurses in Pediatric specialties as an ongoing activity. Training of Doctors and nurses in PALS and NRP.

Paediatric Surgery

INTRODUCTION

Liaquat National Hospital and Medical College is one of the oldest hospitals of the city built over six decades ago, but Paediatric surgical services started 26 years ago. During this short period of time, it developed into one of the most active Paediatric surgical units of the city, not only serving patients from the metropolis but also looking after patients brought in from other parts of the country and from abroad as well.

SERVICES

The Department at present is run by three surgeons. The department has got its own dedicated area for inpatients. Neonates and sick children are looked after in shared neonatal intensive care unit and Paediatric ICUs. On average, 2,000 surgical procedures are performed each year including neonatal surgeries, reconstructive surgeries including urological and gastrointestinal reconstruction, hypospadias and genital reconstruction, and management of solid tumors.

UNDERGRADUATE / POSTGRADUATE TEACHING

Paediatric surgical unit also provides training to the medical students and residents in Paediatric surgery.

Teaching sessions for core curriculum and journal clubs are held on a regular basis.

The Department organizes regular workshops and CMEs to help in the training of students and residents of other units of the city. Paediatric Laparoscopic Workshop is a regular yearly fixture which is recognized and accredited by the British Association of Paediatric Endoscopic Surgeons. Besides this, workshops and live operations have been done for urogenital repair and hepatobiliary reconstruction.

Due to the induction of a Paediatric urology specialist, the department now has a dedicated paediatric urology and nephrology clinic four sessions per week. In addition to that, there is a dedicated paediatric stone management clinic, which has recently started, aiming to treat patients endoscopically and working on stone prevention in children.

The Department is planning to liaise with units in the United Kingdom to provide trainees with further exposure abroad.

RESEARCH

The Department is involved in extensive research activities. It encourages students to do the same and undertake publications in reputable journals.

Plastic & Reconstructive Surgery

INTRODUCTION

Plastic Surgery Department of LNH&MC is among one of the best and the oldest department of the country. It has five full time plastic surgeons in its faculty. It is our honor that we trained maximum number of Plastic Surgeon than any other private hospital.

SERVICES

The department provides 24 hours emergency services including emergency care for burns, gunshot, hand injuries, road accidents, bomb blast, facial trauma and other trauma.

The departments deals with all plastic surgical problems including congenital defects, reconstruction in head and neck cancer, lower limb trauma, nerve transfers, diabetic foot, lymphedema and chronic wounds, and all hand problems.

Cosmetic procedures of liposuction, abdominoplasty, facelift, rhinoplasty, otoplasty, blepharoplasty and fat grafting, Botox and filler injections are routinely carried out. The department has also startup Hair Transplant and PRP procedure in our one stop clinic and OT

The plastic surgery ward is located on the first floor. The ward is fully air conditioned and has facilities of private, semi private rooms and a well-equipped high dependency unit (HDU) for managing critical patients. There are arrangements in the ward for carrying out dressing of burn patients and trauma patients. Services of ICU are also available if required. It also has access to modern and well equipped operations theatre.

UNDERGRADUATE / POSTGRADUATE TEACHING

The department encourages the undergraduates to attend the consulting clinics in the outpatient department, operation theaters and ward rounds to get familiarized with the various aspects of Plastic Surgery. Besides the undergraduate students of Liaquat National Hospital & Medical College, the Plastic Surgery Department also gets students from various other government & private colleges of the city for clinical attachment of 2-4 weeks duration. The department has a busy postgraduate, teaching program, as well.

ACHIEVEMENTS

The department has a fully accredited training program under the auspices of College of Physicians and Surgeons Pakistan. It is among the most sought after residency program of the country. The residents who have qualified from the department are providing services within the country and abroad. Regular Plastic Surgery programs are organized by the department at local, national and international level. The department regularly conducts research projects and has multiple publications to its credit in both national & international journal.

Psychiatry

INTRODUCTION

Psychiatry is a well-established specialty of medicine. The Department of Psychiatry at LNH is committed to evidence based developments in this area and provide our patients with state of art psychiatric care. The Department is headed by Dr. Iqtidar Taufiq and includes 1 other consultant, Dr. Zaib un Nisa and 3 full time clinical psychologists, along with 5 postgraduate trainees of FCPS.

SERVICES

Services include out-patient clinics, teleclinics, Child and Adolescent Guidance Clinic, Psychological Services (Psychometric Testing, Psychotherapy, IQ Testing), and Executive Counseling Services (Marital Counseling, Family Counseling, Career Counseling), ECT (Electro Convulsing Therapy). Stress management clinic, Drug addiction clinic, postpartum depression clinic and Occupational Therapy clinic). Soon to be added will be rTMS. This is the first of its kind in Karachi.

In-patient Services includes Psychiatric Ward with additional patients being admitted in the General, Special and Executive wards. Our main aim is to rehabilitate the patients as early as possible.

UNDERGRADUATE / POSTGRADUATE TEACHING

LNH Psychiatry Department is recognized by the College of Physicians and Surgeons for postgraduate training for FCPS. Undergraduate and postgraduate teaching activities include case conferences, journal club, seminars, Undergraduate classes and clinical training. Department of Psychiatry also contributes regularly to CME.

RESEARCH

The Department is also actively involved in conducting clinical researches in order to provide better awareness regarding mental health illnesses. Over the last one year, 4 scientific papers were published in PM&DC / HEC recognized journals.

Pulmonology and Critical Care

INTRODUCTION

The Department of Pulmonary Medicine at Liaquat National Hospital, established 43 years ago, has long served patients from all over Pakistan. As a pioneer unit established in the private sector in the city of Karachi, it provides comprehensive diagnostic and therapeutic services for patients with illness that affect the lungs and breathing. Well qualified and trained physicians provide care for a range of common and rare respiratory conditions.

SERVICES

The Department has morning, afternoon and evening clinics. The Inpatient Unit/Chest Medicine Unit comprises 32 beds. Bedside diagnostic and therapeutic procedures like Fiber optic bronchoscopy (FOB), Bronchoalveolar Lavage (BAL), central line placement, bedside ultrasound and ECHO cardiogram are performed as required. Ancillary Services include:

- Limited Sleep Study
- Pulmonary function testing
- Bedside fiber optic bronchoscopy
- Transthoracic needle aspirations
- Chest tube insertions and pleurodesis
- Pleural biopsy

UNDERGRADUATE TEACHING

Students of third, fourth and final year rotate in the department and are provided extensive bedside teaching.

RESEARCH

The Department is involved in research activities. It encourages students to publish research articles in peer reviewed journals

Radiology

INTRODUCTION

The department of Radiology and Imaging is at the forefront of innovation and advancement providing premium quality imaging services to the patients.

SERVICES

The Department pioneered the era of high tech imaging by being the first hospital in the country to introduce CT imaging in the year 1984. Now the department has two CT multi- slice scanners (32 and 128 slicers), two 1.5 Tesla MR Scanners, Mammography and bi-planner Angiography.

The Radiology department offers a wide range of non-invasive and interventional radiological services.

- X-Rays, All kind of plain x-rays, fluoroscopy and contrast studies.
- DEXA Scan. (for bone density)
- Ultrasound, All kinds of ultrasounds including whole Body Doppler scans.
- CT scan along with CT Angiography.
- MRI along with MR Angiography and MR spectroscopy.
- Vascular and interventional radiology including angiography and angio- guided embolization.
- Ultrasound and CT guided procedures including all kind of biopsies and drainage procedures.
- Breast interventions including breast and axillary biopsies and interventional clipping.
- Nuclear Medicine tests.
- Radio frequency ablation to treat tumors.
- Stroke Imaging and its management.

UNDER & POST GRADUATE TEACHING AND TRAINING

The Department has a regular training and teaching programme for undergraduate students and postgraduate trainees. It is actively involved in workshops such as hands on training on Carotid Doppler ultrasound and ultrasound guided interventions.

RESEARCH

Faculty and resident participate actively in paper presentations and the department inculcates the importance of research in students and trainees.

Research & Skill Development Centre

INTRODUCTION

Established in 1996 as the country's pioneer Skills Lab, the Research and Skills Development Centre (RSDC) at Liaquat National Hospital has steadily evolved into an independent and esteemed learning facility.

Recognizing the importance of progress, the facility underwent significant expansion in 2012, moving to a purpose-built Clinical Simulation Facility, multifold larger than its initial size. The facility emphasizes customization and participant convenience, offering tailored training programs to meet specific needs.

The Research and Skills Development Centre collaborates with external institutes and organizations through a dedicated full-time team of certified instructors. This ensures high-quality training experiences for all participants. This state-of-the-art facility provides an immersive and realistic environment for comprehensive training.

The Research and Skills Development Centre at Liaquat National Hospital stands as a beacon of lifesaving expertise, empowering individuals with critical knowledge and skills to make a significant impact in the medical field.

SERVICES (AVAILABLE COURSES AND SIMULATORS)

Equipped with a multitude of resources to provide high quality of trainings including; American Heart Association (AHA) accredited Basic Life Support (BLS) and Advanced Cardiovascular Life Support (ACLS), Paediatrics Advance Life Support (PALS), Neonatal resuscitation program (NRP), & Heart Saver First Aid CPR AED. Furthermore, Advanced Airway Management, Basic Interpretation of ECG, Emergency Response Skills, Basic Surgical, Basic Nursing Skills, Basic Clinical Skills and many more.

RSDC is comprised of simulated operation theatre, wet lab, tissue lab, computer lab and learning/ convening spaces. Amongst a wide variety of simulators, the few are Basic and Advance Mannequins of; Advance Life Support (Kelly) & Stat-man, furthermore, Pediatric Advance Life Support and Neonatal Resuscitation Specialized mannequins, Advanced Life Support mannequin for Obstetrics and the Laparoscopic Trainers are also the crucial part of RSDC services.

UNDERGRADUATE TRAININGS:

The integrated curriculum of undergraduate involves Modular Skills sessions at RSDC including, Foundation, Locomotor, Endocrine, Neuroscience, Renal, ObsGynae, Respiratory, Cardiovascular, Hematology, GIT, Reproductive & Common Skills Modules. Students assessed individually by performing steps on the bases of checklists signoff. Simulation based clinical scenarios are safely and ethically enacted as part of trainee assessment in OSCE as well.

ACHIEVEMENTS

In 2017, the center achieved a remarkable feat by earning accreditation from the prestigious American Heart Association (AHA), becoming their International Training Centre for BLS & ACLS Programs. Later on in 2022, RSDC earned an accreditation of PALS Course with 04 of our respected In-hospital faculty members. Recently in August 2024, RSDC team is working to achieve Accreditation on Neonatal Resuscitation Program. Future Plans including More accreditation all over the world including Primary Trauma Care Foundation UK, Hospital Preparedness for Emergencies (HOPE) & many more.

Rheumatology

INTRODUCTION

The Department of Rheumatology at LNH offers cutting-edge care in line with international standards. Our team consists of three highly qualified and experienced rheumatologists.

SERVICES

Our general and subspecialty clinics, along with our inpatient services, accommodate over 25,000 patients annually. We are the only facility in Sindh with dedicated Pediatric Rheumatology and Senior Citizens' Clinics, and we uniquely operate a crystal identification lab within our department. Additionally, our department features a specialized procedure room for intra-articular and soft tissue injections, maintaining a zero percent infection rate according to our records.

UNDERGRADUATE TEACHING / TRAINING / MENTORSHIP

We are deeply committed to educating undergraduate students through regular lectures and bedside classes. Students also participate in numerous research projects, earning recognition from our peers. We offer individual mentorship sessions to support their academic and professional growth.

RESEARCH ACTIVITIES

Our department has published several articles in peer-reviewed journals, with more in various stages of completion. Our trainees have presented research papers at both national and international conferences.

ACHIEVEMENTS

We are proud to have the honor of being the first rheumatology unit in Sindh accredited by CPSP for post-fellowship training. Several of our former trainees now serve as supervisors and lead postgraduate training programs at other institutions, with some achieving recognition abroad. Our department continues to excel and is committed to exploring new opportunities. With our dedicated team, we aspire to elevate our unit to a world-class standard, Insha Allah Taala.

Thoracic Surgery

INTRODUCTION

The Department offers a very high standard of diagnostic and therapeutic facilities. It is recognized as one of the premier centers for treatment of Thoracic surgery diseases and ailments in the city. All types of adult and pediatric Thoracic surgery procedures are performed here. The department has performed a large number of complicated and complex chest operations. On an average over 500 procedures are performed annually.

SERVICES

In addition onsite, laboratory, blood bank, CT scanning, MRI, Carotid Doppler, Dialysis, Ultrasound, Pulmonary function test, diabetic care and physiotherapy services round the clock which not only saves the patient and their families from running around but at the same time speaks of the multi specialization structure of the hospital and make this unit a very safe place for all types of Thoracic Surgery procedures. All types of Pulmonary and Oesophageal surgery including minimally invasive surgery of lung (VATS) and Oesophagus is performed here and diagnostic procedures like Bronchoscopy and Mediastinoscopy.

UNDERGRADUATE AND POSTGRADUATE TEACHING

The department is recognized for training by the College of Physician and Surgeons Pakistan (CPSP) for FCPS in Thoracic Surgery. The students of LNMC rotate through this department as well. During their stay along with bed side teaching, they are encouraged to attend OT to witness Lung Resection operations and other surgeries like Mediastinoscopy and Video Assisted Thoracoscopic Surgery.

RESEARCH

The department encourages research and has published various papers in PMDC recognized journals.

Urology

INTRODUCTION

The Department of Urology LNH&MC is one of the leading urological centers of Pakistan and is fully staffed with full-time consultants, part-time consultants, senior registrars, postgraduate residents and Interns.

SERVICES

The Department provides quality surgical and medical care in all specialties of urology including Minimal invasive Surgery, Endoscopic Urology which includes, URS and RIRS. Urological Oncology, Pediatric Urology, Male and Female Genital Re-constructive surgery, Andrology and Day Care Urology.

The Department is equipped with modern technology and skills. There is a well-established urodynamic evaluation facility in the department used for the evaluation and management of patients with BPH, neurogenic bladders, Overactive bladder and incontinence. Day care urological procedures are carried out using flexible fiber optic and rigid endoscopes. The department also has a well-equipped lithotripsy department for stone management.

Laser surgery is also offered and is an excellent mode of treatment for BPH, bladder tumors, Strictures and stones.

Specialized investigations and procedures are also performed for male sexual problems of erectile dysfunction and infertility.

The highly advanced body imaging facilities at LNH&MC assist in accurately evaluating urological problems. More than 2800 urological procedures are undertaken every year by the department and in excess of 25,000 consultations are performed in the outpatient clinic every year.

UNDERGRADUATE TEACHING

The Department offers an active urology training program and provides excellent training facilities for undergraduate students and postgraduate trainees.

RESEARCH

The Department encourages research and publication and is one of the most active departments in this area and provides continuous research opportunities.

Vascular Surgery

INTRODUCTION

Vascular Surgery is a relatively new and rare specialty in our country and the Department of Vascular Surgery at Liaquat National Hospital and Medical College is one of its kinds in the private sector.

The Department is now more than 20 years old and provides a full range of vascular services to the community round the clock. Vascular team comprises of well trained & experienced faculty members, who includes Professor Dr. Kamal M. Yousuf, Assistant professor Dr. S.M. Hammad Alam, and a recent addition to a female vascular surgeon Dr. Rabia Gilani.

SERVICES

The Department of Vascular Surgery at Liaquat National Hospital is advancing day by day is providing skilled, dedicated and devoted services which not includes 24/7 emergency services but also include following treatment services given commonly:

- Varicose Vein Sclerotherapy
- Endovenous Laser Ablation for Varicose Vein
- Varicose Vein Open Surgery
- Treatment of Hemangiomas / Venous/Arterio-Venous Malformations / Complex Congenital vascular Malformate
- Carotid Endarterectomy and Carotid Body Tumor Excision
- Management of Acute Limb Ischemia / Embolectomy
- Surgical management of Diabetic Foot, compartment syndrome
- Management of Vascular Trauma, Firearm & Bomb blast injuries, and Road Traffic Accidents
- Treatment of Abdominal and Peripheral Arterial Aneurysms
- Treatment of Acute and Chronic Arterial Insufficiency
- Arterio-Venous Fistula Creation (also with PTEFE Graft)
- Venous Thromboembolism.

Moreover complex procedure including repair of Abdominal Aortic Aneurysm peripheral only aneurysms and many others are performed and managed.

UNDERGRADUATE TEACHING

The Department has a comprehensive teaching programme for undergraduate and postgraduate students, keeping in view the needs of our society. The students are exposed to a wide variety of vascular problems and the topics are discussed in form of lectures. Along with that elective students are also given opportunity to get vascular surgery exposure.

RESEARCH

The Department is actively involved in research activities, geared towards meaningful and scientifically sound publications and we now have around 10 publications on common and rare vascular diseases, in renowned journals. Publications on some recent treatment strategies are in process.

FUTURE PLANS:

With the advancement of technology, Vascular Surgery has also adopted newer ways of treatment which would benefit the society and department in long-run with the aim of minimally invasive but effective treatment for the patients. Therefore, we are starting Radio-frequency ablation (RFA) procedure for Varicose Vein treatment and management of complex Hemangioma is more notifiable.

Also, we are working towards establishing a fellowship programme in Vascular Surgery which will be recognized by CPSP, and we are hopeful for inducting Vascular Surgery fellows soon.

Faculty List

Name	Designation	Department
Prof. Dr. Karimullah Makki	Principal	Medical College
Dr. Shaesta Tabassum	Assistant Professor	Accident & Emergency
Dr. Muhammad Abid	Assistant Professor	Accident & Emergency
Dr. Komal Owais	Assistant Professor	Accident & Emergency
Prof. Dr. Muhammad Sirajuddin	Professor	Anesthesiology
Prof. Dr. Nighat Abbas	Professor	Anesthesiology
Dr. Syed Muhammad Nadeem Naqvi	Associate Professor	Anesthesiology
Dr. Syed Muhammad Nadeem	Assistant Professor	Anesthesiology
Dr. Muhammad Amim Anwar	Assistant Professor	Anesthesiology
Dr. Arif Ifthikhar Mallhi	Assistant Professor	Anesthesiology
Dr. Ali Asgher	Assistant Professor	Anesthesiology
Dr. Sarosh Rifaqat Sher	Assistant Professor	Anesthesiology
Prof. Dr. Zia Ul Islam	Professor	Anatomy
Prof. Dr. Saima Athar	Professor	Anatomy
Dr. Lubna Faisal	Assistant Professor	Anatomy
Dr. Fatima Rehman	Assistant Professor	Anatomy
Prof. Dr. Faiza Waseem	Professor	Biochemistry
Dr. Amina Raza	Assistant Professor	Biochemistry
Dr. Faiza Agha	Assistant Professor	Biochemistry
Prof. Dr. Rufina Soomro	Professor	Breast Surgery
Dr. Rabia Niaz Chohan	Assistant Professor	Breast Surgery
Dr. Sabiha Rizwan	Assistant Professor	Breast Surgery
Dr. Mohammad Qaiser Aziz Khan	Assistant Professor	Cardiac Surgery
Prof. Dr. Syed Ishtiaq Rasool	Professor	Cardiology
Dr. Hafeez Ahmed	Associate Professor	Cardiology
Dr. Faisal Ahmed	Assistant Professor	Cardiology
Dr. Najia Aslam Soomro	Assistant Professor	Cardiology
Dr. Kaleemullah Shaikh	Assistant Professor	Cardiology
Dr. Imran Khan Sandeelo	Assistant Professor	Cardiology
Dr. Abeer Sarfaraz	Assistant Professor	Cardiology
Dr. Humaira Ali	Assistant Professor	Chemical Pathology
Prof. Dr. Syed Ali Arsalan	Professor	Chest Medicine
Dr. Zafar Ahmed	Associate Professor	Chest Medicine
Dr. Syed Tabish Rehman	Assistant Professor	Chest Medicine

Liaquat National Hospital

Liaquat National Hospital **Relieving Pain, Healing The Spirit**

Liaquat National Hospital was conceived in 1950 by Syed Wajid Ali Shah and his associates and officially inaugurated in 1958 by Naheed Iskander Mirza wife of President Iskander Mirza. It started with four OPD services and 50 beds and has now grown into one of the biggest private tertiary care centres in Karachi, boasting a bed strength of around 800 beds with diagnostic and treatment facilities in more than 35 medical and surgical specialties.

LNH aims to provide advanced, integrated, and patient-centered health care services at affordable rates. LNH also holds the mantle of being one of the largest training institutes in the private sector with 35 recognized training programs in various clinical and non-clinical departments.

The hospital is equipped with cutting-edge technology to detect, diagnose and deliver top of the line healthcare services. It is widely acclaimed as the “Hospital of Last Resort” both locally and nationally.

LNH has a mammoth annual patient turnover exceeding 1.2 million patients and also undertakes a large number of diagnostics and therapeutic procedures.

Our hospital has multiple state-of-art facilities which include:

- 24/7 Accident and Emergency services for both adult and Paediatric patients.
- Laboratory, Pharmacy, and Radiology services are available around the clock.
- Bi-planer Angiography unit provides services 24/7
- Continuous availability of VIR (Vascular Interventional Radiology) services.
- Stroke services including TPA and MT
- Largest Critical Care service of Pakistan with 89 ICU and 84 high dependency/ step-down beds.
- Blood bank with component separator and other advanced equipment. Blood donation and collection is available 24/7.
- Outreach Medical Services locations in different areas of Karachi.
- A comprehensive Home health service providing high-quality, affordable medical care with consultant’s visits within the comfort of home
- Child and adolescent psychiatry unit.
- Patient-centered Occupational and Speech Therapy services use an interdisciplinary approach to take care of the patients for the purpose of promoting independence, maximizing function and initiating their rehab to provide the continuum of care.
- Paeds development unit working for children’s rehabilitation and development.
- Orthotic and prosthetic appliances production unit.
- Establishment of Pakistan’s first Senior Citizen Primary Day Care unit.
- A Social Services Department for financial and social support to deserving patients.
- Palliative Care Services.
- Total Lab Automation system, which gives 99.9 % accurate results within minutes.
- Sports ground and gymnasium.
- Waste management system.
- A baby daycare Centre for the children of working staff at LNH/LNMC and other colleges of LNH.
- State-of-the-art kitchen catering to patients, faculty, students and visitors’ needs with take-home food facility for staff.
- LNH has an exclusive program for charity and financial assistance for needy patients.
- Beside Liaquat National Medical College, LNH houses four other institutions, College of Nursing, School of Physiotherapy, School of Medical Technology and Diagnostics Laboratory Sciences.

- Research and Skills Development Centre offers certified training courses to both internal and external candidates. It runs more than 65 courses in which Basic Life Support (BLS), Advance Cardio Vascular Life Support (ACLS) and Paeds Advance Life Support (PALS) are accredited by American Heart Association (AHA).
- Registered National center for TB and HIV program.
- Gynea (Antenatal)
- Stroke Rehabilitation
- Respiratory Rehabilitation
- Cardiac Rehabilitation
- Paeds Rehabilitation
- Comprehensive Geriatric Service
- Specialized sports injury services including OPDs and Rehab.

Student's Committees Societies

The college encourages extra-curricular activities and our students are keenly involved in it. We have 09 students' societies to enhance the extra-curricular skills of our students. These student societies are headed by senior faculty members who guide and mentor students in holding of activities related to their society. They teach them organizational skills, budgeting and team building.

- Art & Culture Society
- Literary & Debating Society
- Music & Drama Society
- Sports Society
- Research Committee
- Helping Hands / Philanthropic Society
- Magazine Society
- Yearbook Committee
- Social Society

LNMC Alumni Association

LNMC Alumni Association

INTRODUCTION

Alumni of LNH&MC know firsthand the high quality of education provided to students. They appreciate not only the education they had received, but also the values that LNMC instilled in them i.e. critical perspective on the medical knowledge and a focus on clinical academics. Our alumni are proud that the college has become a leader in medical education and involve students in decision-making.

ACADEMIC ACHIEVEMENTS

LNMC Alumni have done exceptionally well in terms of academic achievements both nationally and internationally.

More than 280 of our Alumni have cleared their FCPS part 1 exam from College of Physicians and Surgeons of Pakistan and are doing their fellowship trainings in different hospitals across the country.

Our alumni are enrolled in top international research programs like, Brown University, Mayo Clinic and Henry Ford.

Alumni are also serving in LNMC teaching programs and have also conducted classes for the LNMC students to guide them for future options.

More than 80 alumni have cleared board and license exams of Australia (AMC), UK (PLAB), Canada (MCCQE), and USA (USMLE).

From the very first batch of 2012, few Alumni members have recently joined the parent Institution LNH as faculty members and are now practicing consultants while some are doing consultancy in peripheral hospitals. Some of these include Dr. Yousuf Shaikh (Neurosurgeon), Dr. Zubda Malik (Urologist) and Dr. Syed Shariq ullah (Radiologist).

Some of our Alumni had their residency matched in following institutes of USA. And are now currently working as MD, consultants in their respective fields.

- Waqas Yasin, Medical College of Wisconsin
- Fawad Shahid, St. Johns Hospital, Detroit
- Rehan Rais, Washington University
- Mukesh Kumar, Montifore Medical Center, Wakefield
- Maria Tariq Siddiqi, University of Oklahoma

LNMC Alumni have been closely in-touch with hospital's Helping Hands Society.

The Alumni association of LNMC was established in 2013 with the aims to:

1. Be the leaders of their alumni & provide resources and support provision to Almamater.
2. Remain in contact with the college faculty and all colleagues.
3. Develop future collaboration with other institute.
4. Help graduating students in terms of career counseling.
5. To address the issues of LNMC graduates working in LNH as FCPS Trainees.

Office Bearers President

Waqas Yaseen

ALUMNI MEMBERSHIP ADVANTAGE

Membership in the LNMC Alumni Association is a great way to show our LNMC pride. Your membership is also a vote for the value of LNMC education and enables the Alumni Association to do great things for alumni, students, and alma mater. LNMC alumni membership offers:

1. Life time free access to gymnasium and library.
2. Medical tests at subsidized costs
3. Continuous liaison with college and hospital and its activities.

FUTURE PLANS

Our alumni are committed to make LNH & MC a best place for graduating students. The focus is on clear overarching goals in three distinct areas:

- A. Academics: To organize regular courses and seminars for FCPS part 1 candidates and orientation classes for USMLE and PLAB.
- B. Social Services: To establish welfare committee for assisting financial needs of deserving patients.
- C. Research: To guide and encourage students for participating in research programs and provide orientation for research publications.
