

LIAQUAT NATIONAL HOSPITAL AND MEDICAL COLLEGE

INSTITUTE FOR POSTGRADUATE MEDICAL STUDIES & HEALTH SCIENCE

LOCOMOTOR MODULE I

8th May 2023 to 8th July 2023

STUDY GUIDE FOR LOCOMOTOR MODULE

S.No	o CONTENTS	
3.110	CONTENTS	No
1	Overview	03
2	Introduction to Study Guide	04
3	Learning Methodologies	05
4	Module 3: Locomotor System	07
5	Importance	07
6	Objectives and strategies	08
6.1	Learning Resources	22
6.2	Assessment Methods	23
7	LNMC Examination Rules And Regulations	24
8	Schedule	25

Module name: Locomotor Year: One Duration: 8 weeks (May – July 2023)

Timetable hours: Interactive Lectures, Case-Based Learning (CBL), Self-Study, Practicals, Skills,

Demonstrations

MODULE INTEGRATED COMMITTEE

MODULE COORDINATOR:	Prof. Zia-Ul-Islam
CO-COORDINATORS:	Dr Faiza Agha

DEPARTMENTS & RESOURCE PERSONS' FACILITATING LEARNING

BASIC HEALTH SCIENCES	CLINICAL AND ANCILLARY DEPARTMENTS			
ANATOMY	GENERAL SURGERY			
Professor Zia-ul-Islam	Pro. Rufina Soomro			
BIOCHEMISTRY	NEUROLOGY			
Professor Kashif Nisar	Dr. Ahmed Asif			
COMMUNITY MEDICINE	ORTHOPAEDICS			
Dr. Saima Zainab	Prof. Syed Shahid Noor			
FORENSIC MEDICINE	PHYSICAL MEDICINE			
Professor Syed Mukkaram Ali	Mr. Muhammad Ali			
PATHOLOGY	RADIOLOGY			
Professor Naveen Faridi	Dr. Misbah Tahir			
PHARMACOLOGY	RHEUMATOLOGY			
Professor Tabassum Zehra	Dr. Tahira Perveen			
PHYSIOLOGY	RESEARCH & SKILLS DEVELOPMENT CENTER			
Professor Syed Hafeezul Hassan	Dr. Kahkashan Tahir			
DEPARTMENT of HEALTH PROFESSIONS EDUCATION				
 Professor Nighat Huda Profe 	ssor Sobia Ali • Dr. Afifa Tabassum			
 Dr. Sana Shah Dr. M. Ahsan Naseer Dr. Yusra Nasir 				
LNH&MC MANAGEMENT				
Professor KU Makki, Principal, LNH&MC				
Dr. Shaheena Akbani, Director A.A & R.T LNH&MC				

INTRODUCTION

WHAT IS A STUDY GUIDE?

It is an aid to:

- Inform students how the student learning program of the module has been organized
- Help students organize and manage their studies throughout the module
- Guide students on assessment methods, rules, and regulations.

THE STUDY GUIDE:

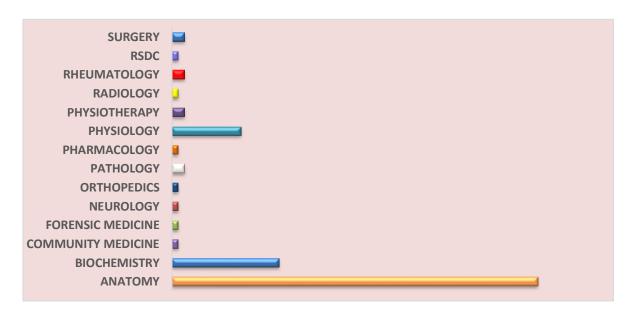

- Communicates information on the organization and management of the module. This will help the student to contact the right person in case of any difficulty.
- Define the objectives which are expected to be achieved at the end of the module.
- Identifies the learning strategies such as Interactive Lectures, small group teachings, clinical skills, demonstrations, tutorials, and case-based learning that will be implemented to achieve the module objectives.
- Provide a list of learning resources such as books, computer-assisted learning programs, weblinks, and journals, for students to consult to maximize their learning.
- Highlights information on the contribution of continuous and module examinations on the Student's overall performance.
- Includes information on the assessment methods that will be held to determine every student's achievement of objectives.
- Focuses on information about examination policy, rules, and regulations.

CURRICULUM FRAMEWORK

Students will experience an integrated curriculum.

INTEGRATED CURRICULUM comprises system-based modules such as the Locomotor system, Respiratory System, and Cardiovascular system which links basic science knowledge to clinical problems. Integrated teaching means that subjects are presented as a meaningful whole. Students will be able to have a better understanding of basic sciences when they repeatedly learn concerning clinical examples. Case-based discussions, computer-based assignments, early exposure to clinics, wards, and skills acquisition in skills lab are characteristics of integrated teaching programs.

INTEGRATING DISCIPLINES OF LOCOMOTOR MODULE

LEARNING METHODOLOGIES

The following teaching/learning methods are used to promote better understanding:

- Interactive Lectures
- Tutorial
- Case- Based Learning (CBL)
- Clinical Experiences
 - Clinical Rotations
- Skills session
- Self-Directed Learning

INTERACTIVE LECTURES: In a large group, the Interactive Lectures introduce a topic or common clinical conditions and explains the underlying phenomena through questions, pictures, videos of patients' interviews, exercises, etc. Students are actively involved in the learning process.

TUTORIAL: This format helps students to clarify concepts, and acquire skills or desired attitudes. Sessions are structured with the help of specific exercises such as patient cases, interviews, or discussion topics. Students exchange opinions and apply knowledge gained from Interactive Lectures, tutorials, and self-study. The facilitator's role is to ask probing questions, summarize, or rephrase to help clarify concepts.

CASE-BASED LEARNING (CBL): A small group discussion format where learning is focused on a series of questions based on a clinical scenario. Students discuss and answer the questions by applying relevant knowledge gained previously in clinical and basic health sciences during the module and constructing new knowledge. The CBIL will be provided by the concerned department.

CLINICAL LEARNING EXPERIENCES: In small groups, students observe patients with signs and symptoms in hospital wards, clinics, and outreach centers. This helps students to relate knowledge of basic and clinical sciences of the module and prepare for future practice.

CLINICAL ROTATIONS: In small groups, students rotate in different wards like Medicine, Pediatrics, Surgery, Obs, and, Gyne, ENT, Eye, Family Medicine clinics, outreach centers & Community Medicine experiences. Here students observe patients, take histories and perform supervised clinical examinations in outpatient and inpatient settings. They also get an opportunity to observe medical personnel working as a team. These rotations help students relate basic medical and clinical knowledge in diverse clinical areas.

SKILLS SESSION: Skills relevant to the respective module are observed and practiced where applicable in the skills laboratory.

SELF-DIRECTED LEARNING Students assume responsibilities for their learning through individual study, sharing and discussing with peers, and seeking information from Learning Resource Center, teachers, and resource persons within and outside the college. Students can utilize the time within the college's scheduled hours of self-study.

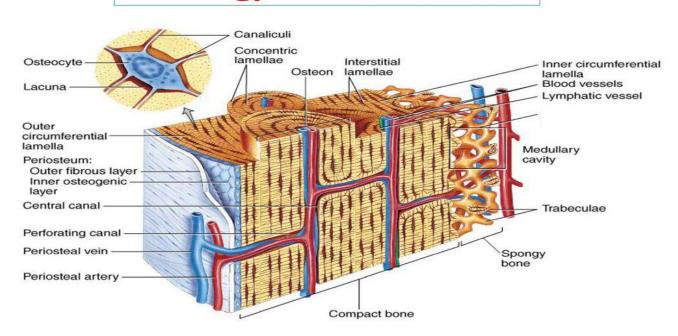

LOCOMOTOR MODULE

IMPORTANCE OF LOCOMOTOR SYSTEM

Individuals at some time likely suffer from a problem related to the musculoskeletal system, ranging from a very common problem such as osteoarthritis or back pain to severely disabling limb trauma or rheumatoid arthritis. Many musculoskeletal problems are chronic conditions as well. The most common symptoms are pain and disability, with an impact not only on individuals' quality of life but also, importantly, on people's ability to earn a living and be independent. It has been estimated that one in four consultations in primary care is caused by problems with the musculoskeletal system. A healthy lifestyle such as exercise and diet is recommended for maintaining good health.

Throughout this module, students will have the opportunity to link basic science knowledge to clinical problems. Teaching relevant basic sciences with clinical examples will help you make connections among concepts and retain the information for later clinical education.

Histology of Bone Tissue

TOPICS, OBJECTIVES, AND STRATEGIES

By the end of the module students will be able to:

ANATOMY

OBJECTIVES	LEARNING STRATEGY
1. Introduction to the Musculoskeletal system	
Discuss the division and functions of the skeletal system	
Enumerate the parts of the axial and appendicular skeleton	Interactive
Define pectoral & pelvic girdle	Lecture
Describe the division and curvature of the vertebral column	
Discuss the types and number of vertebrae found in adults	
2. Embryology Development of Paraxial Mesoderm& muscles	
Define epiblast and hypoblast	
Explain the differentiation of tri-laminar germ disc	Interactive
Discuss the formation of mesoderm and paraxial mesoderm	Lecture
Discuss the developmental relationship between hypaxial and epaxial muscles	
Describe the process of myogenesis in the types of muscle	
UPPER LIMB	
3. Sternoclavicular and Acromioclavicular Joints	
Classify the types of Sternoclavicular and Acromioclavicular joint	
Describe their structure	Interactive Lecture
Name the muscles acting on these joint	
Explain the movements at these joint	
Explain the clinical aspects of these joint	
4. Breast Development, Gross and Histology	
Discuss the anatomy of the breast	
Explain the relation of breasts within the pectoral region	
Describe the blood supply & lymphatic drainage of breast	Interactive Lecture
Discuss the relation of breast disease with the axilla	Eccture
Explain the development of breast	
Discuss the histological features of breast	
5. Brachial Plexus	
Describe the formation of the brachial plexus, with its root value and divisions (roots, trunk, division, and cords)	
Discuss the relation of the brachial plexus also in connection to the clavicle (Supra, retro, infra clavicular)	Interactive
parts	Lecture
Enumerate the branches arising from the cords	
Draw the brachial plexus	
Name the muscles and skin supplied by the branches of the brachial plexus	
6. Development of limbs & joints and their congenital anomalies	Interactive

·		
Discuss the site and time of appearance of upper and lower limb buds	Lecture	
Define apical ectodermal ridge (AER)		
• Describe the mesenchymal proliferation under the influence of AER and differentiation into cartilaginous models of future limb bones		
Define the source of mesoderm forming the limb muscles		
Discuss the hand plate and formation of digital rays resulting in digits		
Describe the muscles involved in and process of rotation of both limbs		
Discuss the differentiation of mesenchyme to form fibrous, cartilaginous, and synovial joints		
Discuss the congenital anomalies of both limbs & joints		
7. Muscles of the anterior compartment of the arm & neurovascular supply		
Enumerate the muscles of the anterior compartment of the arm		
Discuss the attachment of muscles, their nerves supply, and their actions	Interactive	
Explain the course of the muscular cutaneous nerve, its branches, and distribution	Lecture	
Discuss the large nerves of the arm		
Predict the impact of lesions of the main nerves of the compartment		
8. Muscles of the Posterior compartment of the arm & neurovascular supply		
Name the muscles present in the posterior compartment of the arm		
	la ta va ativa	
Describe the actions performed by the muscles of the posterior compartment of the arm	Interactive	
 Describe the actions performed by the muscles of the posterior compartment of the arm Name the nerve supply of the muscles of this compartment 	Lecture	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this 	Lecture	
Name the nerve supply of the muscles of this compartment	Lecture	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply 	Lecture	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm 		
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment 	Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm 		
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 9. Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment 	Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm 	Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 9. Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this 	Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 9. Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment 	Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 	Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 9. Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 10. Muscles of the posterior compartment of the forearm & neurovascular supply 	Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 9. Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 10. Muscles of the posterior compartment of the forearm & neurovascular supply Name the muscles present in the posterior compartment of the forearm 	Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the posterior compartment of the forearm & neurovascular supply Name the muscles present in the posterior compartment of the forearm Explain the division of muscle layer in the posterior compartment 	Interactive Lecture	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the posterior compartment of the forearm & neurovascular supply Name the muscles present in the posterior compartment of the forearm Explain the division of muscle layer in the posterior compartment Explain the actions of the muscles of the posterior compartment of the forearm 	Interactive Lecture Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the posterior compartment of the forearm & neurovascular supply Name the muscles present in the posterior compartment Explain the division of muscle layer in the posterior compartment Explain the actions of the muscles of the posterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this 	Interactive Lecture Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the posterior compartment of the forearm & neurovascular supply Name the muscles present in the posterior compartment of the forearm Explain the division of muscle layer in the posterior compartment Explain the actions of the muscles of the posterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment 	Interactive Lecture Interactive	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the posterior compartment of the forearm & neurovascular supply Name the muscles present in the posterior compartment of the forearm Explain the division of muscle layer in the posterior compartment Explain the actions of the muscles of the posterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic 	Interactive Lecture Interactive Lecture	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the posterior compartment of the forearm & neurovascular supply Name the muscles present in the posterior compartment of the forearm Explain the division of muscle layer in the posterior compartment Explain the actions of the muscles of the posterior compartment Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment Describe the course of vessels present in this compartment Discuss the clinical aspect related to the topic Wrist joint, Radioulnar & small joints of the hand 	Interactive Lecture Interactive Lecture	
 Name the nerve supply of the muscles of this compartment Explain the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the anterior compartment of the forearm & neurovascular supply Name the muscles present in the anterior compartment of the forearm Explain the division of muscle layer in the anterior compartment Explain the actions of the muscles of the anterior compartment of the forearm Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment along with the supply to the structures in this compartment Discuss the clinical aspect related to the topic Muscles of the posterior compartment of the forearm & neurovascular supply Name the muscles present in the posterior compartment of the forearm Explain the division of muscle layer in the posterior compartment Explain the actions of the muscles of the posterior compartment Discuss the nerve supply of the muscles of this compartment Describe the course of vessels present in this compartment Describe the course of vessels present in this compartment Discuss the clinical aspect related to the topic Wrist joint, Radioulnar & small joints of the hand Describe the morphology of the wrist joint 	Interactive Lecture Interactive Lecture	

Classify the intercarpal, metacarpal, and interphalangeal joint	
Discuss the clinical aspect related to the topic	
12. Blood vessels and nerves of the hand	
Enumerate the arterial supply of hand	
• Describe the course and relations of radial and ulnar arteries, and branches of radial and ulnar arteries,	Interactive
with relation to hand	Lecture
• Discuss the formation of the superficial and deep palmar arch, veins of the hand, and their tributaries	
Describe the nerves of the hand and their injuries	
13. Cutaneous supply of upper limb	Interactive
Describe in detail the cutaneous supply and dermatomes of the upper limb	Lecture
14. Venous and lymphatic drainage of the upper limb	
Explain the course of major superficial veins of the upper limb	Interactive
Describe the applied anatomy of superficial veins of the upper limb	Lecture
Describe the group and area of drainage of each group of lymph nodes	
15. Nerve injuries of the Upper limb	
Recall the different nerves of the upper limb and their root value	Intoractivo
Discuss the causes of nerve injuries in the upper limb	Interactive Lecture
Enumerate the common sites of injury of the most commonly injured nerves	Lecture
Discuss the symptoms caused by these nerve injuries	
LOWER LIMB	
16. Formation of lumbosacral plexus, & its injuries	
Discuss the formation of the lumbar plexus	
List the branches of the lumbar plexus with their root values	
Discuss relation of the nerves with psoas major muscle	Interactive
Structures supplied by lumbar plexus	Lecture
Explain the formation of the sacral plexus	
Describe the composition and relations of the sacral plexus	
Enumerate branches of this plexus	
Discuss the cutaneous supply of lower limb	
17. Muscles of the Anterior compartment of the thigh (Femoral triangle, femoral sheath & Neurovascular supply)	
Discuss the arrangement of the thigh into compartments	
Explain the muscles of the anterior compartment of the thigh and their respective actions	Interactive
Describe the innervation and blood supply of muscles of the anterior compartment of the thigh	Lecture
Describe the Femoral triangle, its boundaries and contents, and the Femoral sheath and its contents	-
 Discuss the clinical conditions associated with an anterior compartment of the thigh, femoral triangle, and femoral sheath 	
18. Gluteal Region	
Describe the location of the gluteal region	
Discuss bones and ligaments of the gluteal region	Interactive
Discuss the muscles of the gluteal region and their respective actions	Lecture
Discuss the nerves and blood vessels of the gluteal region	
Enumerate different structures entering and leaving the gluteal region	
Discuss the clinical conditions associated with the gluteal region	

	1" YEAR IVIDES, LUCUIVIUTUR IVIC		
19. Muscles of the Posterior compartment of the th	gh and neurovascular supply		
• Discuss the arrangement of the thigh into compartment	ents		
• Explain the muscles of the posterior compartment of	the thigh and their respective actions	Interactive	
Describe the innervation and blood supply of muscles of the posterior compartment of the thigh		Lecture	
• Discuss the greater and cruciate anastomoses at the	back of the thigh		
Discuss the clinical conditions associated with the po	sterior compartment of the thigh		
20. Anterior & Lateral compartment of leg (muscles,	nerves, and vessels)		
Discuss the facial compartments of the leg		Interactive	
• Explain muscles of the anterior and lateral compartm	ent with its neurovascular supply	Lecture	
Describe clinical like the compartment syndrome			
21. Posterior compartment of the leg			
• Enumerate the muscles of the posterior compartmen	nt of the leg	Interactive	
• Discuss the actions of muscles of the posterior comp	artment of the leg	Lecture	
• Describe the nerves and vessels of the compartment	and their supply		
23. Sole of foot & nerves and vessels of foot			
Describe the architecture of the sole of the foot			
Enumerate the layers of the sole of the foot			
Discuss the muscle presenting the sole of the foot			
Discuss the blood supply and nerve supply of the sole	e of the foot	Interactive	
22. Cutaneous supply of lower limb		Lecture	
Describe in detail the cutaneous supply of lower limb			
23. Venous and lymphatic drainage of the lower limb			
Enumerate the superficial veins			
• Discuss the course of great and small saphenous veins and	their connections with the deep veins of the leg		
24. Injuries of the lower limb			
 Recall the different nerves of the lower limb and their 	r root value		
Discuss the causes of their injuries			
• Enumerate the sites of injury of the most commonly	injured nerves	lako anakii sa	
 Discuss the symptoms caused by these nerve injuries 		Interactive Lecture	
Discuss the fracture of bones of the lower limb		200000	
Explain injuries of lower leg and ankle			
Discuss Pott's fracture			
Explain Sprained ankle			
UPPER LIMB			
25. Clavicle (Osteology & muscle attachments)		Interactive	
 Identify the features of Clavicle borders, surfaces, an 	d landmarks used for side determination	Lecture	
 Discuss the attachments of muscles on the Clavicle, t 	heir nerve supply, and actions		
26. Scapula (Osteology & muscle attachments)			
Identify Scapula and its sites			
 Mention the bony landmarks of Scapula like borders, surfaces & landmarks used for side determination Discuss the attachment of muscles on the Scapula, their nerve supply, and actions 		Interactive Lecture	
		Lecture	
Discuss the Clinical anatomy of the Scapula		1	
27. Humerus (Osteology & muscle attachments)		Interactive	

	
Identify Humerus and its site	Lecture
 Mention its bony landmarks like borders, surfaces & landmarks used for side determination 	
Discuss the attachment of muscles on the Humerus, their nerve supply, and actions	
Explain the clinical conditions associated with Humerus anatomy	
28. Pectoral Region	
Enumerate the muscles of the pectoral girdle	
Describe the attachments of the muscle of the pectoral girdle and its neurovascular supply	le to restino
 Explain the role of muscles of the pectoral region in stabilizing the pectoral girdle 	Interactive Lecture
Discuss the clavi-pectoral fascia	
Describe the triangle of auscultation	
Name the nerves and blood vessels of this region	
29. Anatomy of Shoulder joint & its movements	
Classify the types of the shoulder joint	
Describe the structure of the shoulder joint	latanati:
Name the muscles acting on the joint/rotator cuff muscles	Interactive Lecture
Explain the range of mobility	Lecture
Describe the movements of the shoulder joint	
Explain clinical aspects of the joint	
30. Axilla, boundaries, and contents along with axillary artery and veins	
Describe the position and shape of the axilla	
Name the boundaries of the axilla, and the muscles forming these boundaries	Interactive Lecture
Discuss the formation, course, and relations of axillary vessels	Eccture
Describe the groups of axillary lymph nodes and their arrangement	
31. Radius (Osteology & muscle attachments)	
Identify the bones of the forearm & hand	
Determine the side of bones	
Identify the features of bones & muscles attached to bones	
Describe the nerve supply and actions of muscles	
Discuss the clinical significance of bones	Interactive
32. Ulna (Osteology & muscle attachments)	Lecture/
Identify the bone	Practical
Determine the side of the bone	
Describe the surfaces, borders, and ends of the bone	
Identify the bony landmarks of bone & muscles attachment sites on the bone	
Describe the nerve supply and actions of muscles	
Discuss the clinical significance of this bone	
33. Cubital fossa & Anastomosis around the elbow	
Describe the boundaries, contents, and relationships among structures of the cubital fossa	
Identify the surface anatomy of the cubital fossa	
Discuss the clinical importance of the cubital fossa	
Describe the formation of anastomosis around the elbow joint	
Describe the significance of anastomosis and collateral circulation	

LIAQUAT NATIONAL MEDICAL COLLEGE	EAR IVIDDS, LUCUIVIU I UR IVIUDULE
34. Elbow Joint	
Identify the morphology of the join.	
Discuss the muscles acting on the elbow joint	Interactive Lecture
Explain the neurovascular supply of the joint	Lecture
Describe the carrying angle and applied aspects of this joint	
35. Osteology of hand	
Describe the bony arrangement of hand	
36. Muscles & Spaces of Hand	
Discuss the muscles of the hand	
Locate the different spaces of the hand on both palmar and dorsal aspects	
Describe the spaces of the hand	Interactive Lecture
Discuss the clinical importance of these spaces	Lecture
37. Surface Anatomy of Upper limb	
Perform surface markings for main vessels of the upper limb	
38. Radiology of upper limb	
Identify the normal bony landmarks on X-Ray	
LOWER LIMB	
39. Hip Bone (Osteology & muscle attachments)	
Enumerate the parts of the hip bone	
Discuss its size determination	Interactive Lecture
Describe in detail the osteology of each part of the hip bone	Lecture
Discuss its muscle and ligamentous attachments	
Discuss the clinical conditions related to Hip bone	
40. Femur (Osteology & muscle attachments)	
Identify Femur and its side	
Describe its anatomical position	Interactive
Identify its bony landmarks	Lecture
Discuss the muscles and ligaments attached to Femur	
Discuss the clinical conditions related to it	
41. Hip joint; movements & anastomoses around hip joint	
Describe the formation of the hip joint	
Discuss the characteristics and features of synovial joint	
Describe the articular surfaces of the hip joint	
Discuss the attachment of its joint capsule	Interactive
Explain the ligaments stabilizing the hip joint	Lecture
Discuss the muscles acting on the hip joint and different movements perfor	med at it
Describe its innervations and blood supply	
Describe the arterial anastomosis around the hip joint.	
Discuss the clinical conditions associated with the hip joint	
42. Deep fascia of the thigh	
Explain the arrangement and attachment of the deep fascia of the thigh	Interactive
Discuss the location of the saphenous opening and its relations	Lecture
Describe the attachments of the inguinal ligament	

Interactive Lecture Interact	,		
• Identify the Tibia and its side • Describe its anatomical position · Identify its bony landmarks • Discuss the muscles and ligaments attached to Tibia • Describe the ossification of the tibia and its primary and secondary ossification centers • Discuss the fractures and other clinical conditions associated with it 44. Fibial (Oscology & muscle attachments) • Identify Fibula and its side • Mark the attachment of muscles and ligaments • Elaborate on the joints formed by it • Describe the nerve injuries related to it 45. Popliteal Fossa & its contents • Discuss the boundaries of the popliteal fossa • Enumerate the contents of the popliteal fossa • Enumerate the contents of the popliteal fossa • Enumerate the contents of the popliteal fossa • Explain how the popliteal artery can be palpated • Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking • Classify the knee joint • Discuss the neurovascular supply of knee joint and the muscles responsible for that movement • Discuss the neurovascular supply of knee joint 47. Osteology of foot • Describe the locking and unlocking mechanism • Discuss the muscle presenting the sole of the foot • Describe the body arrangement of the foot • Describe the architecture of the sole of the foot • Discuss the muscle presenting the sole of the foot • Discuss the biond supply and nerve supply of the sole of the foot • Discuss the biond supply and nerve supply of the sole of the foot • Describe the larchitecture of arches of the foot • Describe the ligaments which are responsible for forming these arches • Describe the ligaments which are responsible for forming these arches • Describe the flantar fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint • Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Interactive Lecture	Discuss the clinical conditions associated with the deep fascia of the thigh and inguinal ligament		
Discuss the muscles and ligaments attached to Tibia Discuss the muscles and ligaments attached to Tibia Discuss the muscles and ligaments attached to Tibia Discuss the fractures and other clinical conditions associated with it 44. Fibula (Osteology & muscle attachments) Identify Fibula and its side Mark the attachment of muscles and ligaments Elaborate on the joints formed by it Discuss the broad form of the popiliteal fossa Enumerate the contents of the popiliteal fossa (e.g. the Baker's cyst) 65. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss clinical conditions related to popiliteal fossa (e.g. the Baker's cyst) 66. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss the neurovascular supply of knee joint and the muscles responsible for that movement be Explain types of movement performed at the knee joint and the muscles responsible for that movement be Explain types of movement performed at the knee joint and the muscles responsible for that movement be Explain types of movement performed at the knee joint and the muscles responsible for that movement be Explain types of movement performed at the knee joint and the muscles responsible for that movement be Excitive the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 75. Oscerbie the hark leavers of the sole of the foot Describe the lavers of the sole of the foot Describe the architecture of the sole of the foot Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the larth texture of the sole of the foot Describe the larth texture of the foot Elaborate on the bones which a	43. Tibia (Osteology & muscle attachments)		
Identify its bony landmarks Discuss the muscles and ligaments attached to Tibia Describe the ossification of the tibia and its primary and secondary ossification centers Discuss the fractures and other clinical conditions associated with it Discuss the fractures and other clinical conditions associated with it Describe the ossification of muscles and ligaments Identify Fibula (Osteology & muscle attachments) Identify Fibula and its side Mark the attachment of muscles and ligaments Elaborate on the joints formed by it Describe the nerve injuries related to it Describe the nerve injuries related to it Discuss the boundaries of the popliteal fossa Discuss the boundaries of the popliteal fossa Discuss the boundaries of the popliteal fossa Discuss the evolution of the contents.	Identify the Tibia and its side		
Discuss the muscles and ligaments attached to Tibia Describe the ossification of the tibia and its primary and secondary ossification centers Discuss the fractures and other clinical conditions associated with it 44. Fibual (Osteology & muscle attachments) Identify Fibula and its side Mark the attachment of muscles and ligaments Elaborate on the joints formed by it Describe the nervie injuriers related to it 45. Popliteal Fossa & its contents Discuss the boundaries of the popliteal fossa Enumerate the contents of the popliteal fossa Enumerate the contents of the popliteal fossa Enumerate the contents of the popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss the neurovascular supply of knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the biood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are responsible for forming these arches Describe the function of the arches of the foot Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Interactive Lecture Interactive Lecture Lecture and Interactive Lecture Lecture Interactive Lecture	Describe its anatomical position		
Discuss the fractures and other clinical conditions associated with it 44. Fibula (Osteology & muscle attachments) Identify Fibula and its side Mark the attachment of muscles and ligaments Elaborate on the joints formed by it Discuss the fractures of the popliteal fossa Enumerate the contents of the popliteal fossa Enumerate the locking and unlocking and unlocking Classify the knee joint, genicular anastomosis, and locking and unlocking Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the architecture of the sole of the foot Describe the locking and unlocking the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the bond supply and nerve supply of the sole of the foot Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the bond supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot Describe the architecture of arches of the foot Describe the foot the foot Describe the foot the foot the foot Describe the foot	Identify its bony landmarks		
Discuss the fractures and other clinical conditions associated with it 44. Fibula (Osteology & muscle attachments) Identify Fibula and its side Mark the attachment of muscles and ligaments Elaborate on the joints formed by it Describe the nerve injuries related to it 45. Popliteal Fossa & its contents Discuss the boundaries of the popliteal fossa Enumerate the contents of the popliteal fossa Describe the relationship of the contents. Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss the stricular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the hound supply and nerve supply of the sole of the foot Describe the architecture of the sole of the foot Describe the function of the arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of t	Discuss the muscles and ligaments attached to Tibia		
44. Fibula (Osteology & muscle attachments) Identify Fibula and its side Mark the attachment of muscles and ligaments Elaborate on the joints formed by it Describe the nerve injuries related to it 45. Popliteal Fossa & its contents Discuss the boundaries of the popliteal fossa Enumerate the contents of the popliteal fossa Describe the relationship of the contents. Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot. Describe the function of the arches of the foot to be success the foot of the foot Describe the function of the arches of the foot to be success the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches	Describe the ossification of the tibia and its primary and secondary ossification centers	Interactive	
• Identify Fibula and its side • Mark the attachment of muscles and ligaments • Elaborate on the joints formed by it • Describe the nerve injuries related to it 45. Popliteal Fossa & its contents • Discuss the boundaries of the popliteal fossa • Enumerate the contents of the popliteal fossa • Enumerate the contents of the popliteal fossa • Describe the relationship of the contents. • Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking • Classify the knee joint • Discuss its articular surfaces, the synovial capsule • Describe the locking and unlocking mechanism • Discuss the neurovascular supply of knee joint 47. Osteology of foot • Describe the bony arrangement of the foot • Describe the architecture of the sole of the foot. • Discuss the muscle presenting the sole of the foot • Discuss the muscle presenting the sole of the foot • Discuss the blood supply and nerve supply of the sole of the foot • Describe the architecture of arches of the foot and the fact responsible for their maintenance • Elaborate on the bones which are responsible for forming these arches • Describe the function of the arches of the foot • Describe the larchitecture of arches of the foot • Describe the function of the arches of the foot • Describe the function of the arches of the foot • Describe the ligaments which are responsible for forming these arches • Describe the function of the arches of the foot • Describe the Ankle Joint, superior & Inferior tibiofibular joint • Describe the Ankle Joint, the type, the articular surface, and the synovial capsule • Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Discuss the fractures and other clinical conditions associated with it	Lecture	
Mark the attachment of muscles and ligaments Elaborate on the joints formed by it Describe the nerve injuries related to it 5. Popliteal Fossa & its contents Discuss the boundaries of the popliteal fossa Enumerate the contents of the popliteal fossa Enumerate the contents of the popliteal fossa Describe the relationship of the contents. Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the function of the arches of the foot Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	44. Fibula (Osteology & muscle attachments)		
Elaborate on the joints formed by it Describe the nerve injuries related to it S. Popliteal Fossa & its contents Discuss the boundaries of the popliteal fossa Enumerate the contents of the popliteal fossa Enumerate the contents of the popliteal fossa Enumerate the relationship of the contents. Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 6. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the function of the arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Identify Fibula and its side		
Describe the nerve injuries related to it 45. Popliteal Fossa & its contents Discuss the boundaries of the popliteal fossa Enumerate the contents of the popliteal fossa Enumerate the contents of the popliteal fossa Describe the relationship of the contents. Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the architecture of the sole of the foot Describe the layers of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe the splantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Interactive Lecture	Mark the attachment of muscles and ligaments		
45. Popliteal Fossa & its contents • Discuss the boundaries of the popliteal fossa • Enumerate the contents of the popliteal fossa • Enumerate the relationship of the contents. • Explain how the popliteal artery can be palpated • Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking • Classify the knee joint • Discuss its articular surfaces, the synovial capsule • Explain types of movement performed at the knee joint and the muscles responsible for that movement • Describe the locking and unlocking mechanism • Discuss the neurovascular supply of knee joint 47. Osteology of foot • Describe the bony arrangement of the foot • Describe the architecture of the sole of the foot. • Enumerate the layers of the sole of the foot. • Discuss the muscle presenting the sole of the foot. • Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot • Describe the architecture of arches of the foot and the fact responsible for their maintenance • Elaborate on the bones which are responsible for forming these arches • Describe the algaments which are holding these arches • Describe the function of the arches of the foot • Describe the Ankle Joint, superior & Inferior tibiofibular joint • Describe the Ankle Joint, the type, the articular surface, and the synovial capsule • Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Elaborate on the joints formed by it		
Discuss the boundaries of the popliteal fossa Enumerate the contents of the popliteal fossa Describe the relationship of the contents. Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the function of the arches of the foot Describe the Iligaments which are holding these arches Describe the function of the arches of the foot Describe the Ankle Joint, superior & Inferior tibiofibiular joint Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Describe the nerve injuries related to it		
Enumerate the contents of the popliteal fossa Describe the relationship of the contents. Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the Ankle Joint, superior & Inferior tibiofibular joint Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	45. Popliteal Fossa & its contents		
Describe the relationship of the contents. Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 7. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the muscle presenting the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe the function of the arches of the foot Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Discuss the boundaries of the popliteal fossa		
Explain how the popliteal artery can be palpated Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries D. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Enumerate the contents of the popliteal fossa	Interactive	
Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst) 46. Knee joint, genicular anastomosis, and locking and unlocking Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Describe the relationship of the contents.	Lecture	
46. Knee joint, genicular anastomosis, and locking and unlocking • Classify the knee joint • Discuss its articular surfaces, the synovial capsule • Explain types of movement performed at the knee joint and the muscles responsible for that movement • Describe the locking and unlocking mechanism • Discuss the neurovascular supply of knee joint 47. Osteology of foot • Describe the bony arrangement of the foot • Describe the architecture of the sole of the foot. • Enumerate the layers of the sole of the foot. • Discuss the muscle presenting the sole of the foot • Discuss the blood supply and nerve supply of the sole of the foot • Describe the architecture of arches of the foot and the fact responsible for their maintenance • Elaborate on the bones which are responsible for forming these arches • Describe the ligaments which are holding these arches • Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint • Describe the Ankle Joint, the type, the articular surface, and the synovial capsule • Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints, or mid-tarsal joints.	Explain how the popliteal artery can be palpated		
Classify the knee joint Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 77. Osteology of foot Describe the bony arrangement of the foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Discuss clinical conditions related to popliteal fossa (e.g. the Baker's cyst)		
 Discuss its articular surfaces, the synovial capsule Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot Lecture 48. Sole of foot & nerves and vessels of foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe Plantar Fascitis and relevant injuries Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	46. Knee joint, genicular anastomosis, and locking and unlocking		
Explain types of movement performed at the knee joint and the muscles responsible for that movement Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot 48. Sole of foot & nerves and vessels of foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot. Discuss the blood supply and nerve supply of the sole of the foot. Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Classify the knee joint		
Describe the locking and unlocking mechanism Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot 48. Sole of foot & nerves and vessels of foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Interactive Lecture Interactive Lecture	Discuss its articular surfaces, the synovial capsule	Interactive	
Discuss the neurovascular supply of knee joint 47. Osteology of foot Describe the bony arrangement of the foot 48. Sole of foot & nerves and vessels of foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Interactive Lecture Interactive Lecture Interactive Lecture	• Explain types of movement performed at the knee joint and the muscles responsible for that movement		
47. Osteology of foot • Describe the bony arrangement of the foot 48. Sole of foot & nerves and vessels of foot • Describe the architecture of the sole of the foot. • Enumerate the layers of the sole of the foot. • Discuss the muscle presenting the sole of the foot • Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot • Describe the architecture of arches of the foot and the fact responsible for their maintenance • Elaborate on the bones which are responsible for forming these arches • Describe the ligaments which are holding these arches • Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint • Describe the Ankle Joint, the type, the articular surface, and the synovial capsule • Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Describe the locking and unlocking mechanism		
Describe the bony arrangement of the foot 48. Sole of foot & nerves and vessels of foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Discuss the neurovascular supply of knee joint		
48. Sole of foot & nerves and vessels of foot Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	47. Osteology of foot	Interactive	
Describe the architecture of the sole of the foot. Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints.	Describe the bony arrangement of the foot	Lecture	
Enumerate the layers of the sole of the foot. Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. Interactive Lecture	48. Sole of foot & nerves and vessels of foot		
 Discuss the muscle presenting the sole of the foot Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	Describe the architecture of the sole of the foot.		
 Discuss the blood supply and nerve supply of the sole of the foot 49. Arches of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	• Enumerate the layers of the sole of the foot.		
 49. Arches of the foot Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	Discuss the muscle presenting the sole of the foot		
 Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	Discuss the blood supply and nerve supply of the sole of the foot		
 Describe the architecture of arches of the foot and the fact responsible for their maintenance Elaborate on the bones which are responsible for forming these arches Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	49. Arches of the foot		
 Describe the ligaments which are holding these arches Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	• Describe the architecture of arches of the foot and the fact responsible for their maintenance	Lecture	
 Describe the function of the arches of the foot Describe Plantar Fascitis and relevant injuries Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	Elaborate on the bones which are responsible for forming these arches		
 Describe Plantar Fascitis and relevant injuries 50. Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	Describe the ligaments which are holding these arches		
 Ankle joint, superior & Inferior tibiofibular joint Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	Describe the function of the arches of the foot		
 Describe the Ankle Joint, the type, the articular surface, and the synovial capsule Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. 	Describe Plantar Fascitis and relevant injuries		
• Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. Interactive Lecture	50. Ankle joint, superior & Inferior tibiofibular joint		
• Discuss the Superior and Inferior Tibio-Fibular Joints, Sub-talar joints, transverse tarsal joints, or mid-tarsal joints. Lecture	Describe the Ankle Joint, the type, the articular surface, and the synovial capsule	Interactive	
Describe the movement performed and the muscles responsible for this movement			
	Describe the movement performed and the muscles responsible for this movement		

1st YEAR MBBS, LOCOMOTOR MODULE

Discuss the neurovascular supply of the joints	
51. Surface anatomy of lower limb	
Mark the different joints of the lower limb	
Mark the course of blood vessels of the lower limb	
Palpate the blood vessels	Interactive Lecture/Practical
Mark the course of important nerves of the lower limb	Lecture/Tracticul
52. Radiology of lower limb	
Identify the normal bony landmarks as seen on the X-Ray	
53. Histology of bone	
Define bone tissue	
Classify bones macroscopically (compact & spongy) and microscopically	
Differentiate compact and spongy bones based on cells and matrix	Practical
Describe the arrangement of spongy and compact bones in different parts of long bones	
Define Periosteum & Endosteum	
Discuss bone formation, growth, remodeling & repair	
54. Histology of cartilage	
Describe the components of cartilage that is cells, fibers, and ground substance	
Differentiate the 3 types of cartilage based on differences in components and the presence or absence of perichondrium	Practical
Discuss chondrogenesis, growth, and repair	

BIOCHEMISTRY

OBJECTIVES	LEARNING STRATEGY	
EXTRACELLULAR MATRIX		
1. Glycosaminoglycans		
Describe the biochemical structure and composition of the extracellular matrix		
Discuss the functions of the extracellular matrix		
Describe the structure of Glycosaminoglycans	Interactive	
Classify the Glycosaminoglycans	Lecture/Tutorial	
Discuss the biochemical functions of Glycosaminoglycans		
Discuss the clinical significance of the diseases associated with Glycosaminoglycans		
Discuss the clinical importance of Glycosaminoglycans		
Correlate the laboratory investigations with relevant clinical conditions		
2. Collagen & Elastin		
Describe the structure of Collagen & Elastin]	
Classify Collagen & Elastin.	Interactive Lecture	
Discuss the biochemical functions of Collagen & Elastin	Eccture	
Discuss the clinical significance of the diseases associated with Collagen & Elastin		
VITAMIN C	last a maretica	
3. Vitamin C	Interactive Lecture/Tutorial	
Explain the dietary sources and daily recommended allowance of Vitamin C		

Discuss the metabolism of vitamin C in the human body.	
Describe the physical and chemical properties of vitamin C	
Discuss the biochemical functions of vitamin C, especially concerning Collagen and extracellular matrix	
Discuss the clinical significance of vitamin C deficiency	
Discuss the clinical importance of Vitamin C	
Correlate the laboratory investigations with relevant clinical conditions	
BONE METABOLISM	
4. Vitamin D	
Explain the dietary sources and daily recommended allowance of Vitamin D	
Discuss the metabolism of vitamin D in the human body	
Discuss the regulation of serum calcium concerning bone metabolism	Interactive Lecture/Tutorial
Discuss the biochemical functions of vitamin D	Lecture, ratorial
Discuss the clinical significance of vitamin D deficiency and its prevention.	
Discuss the clinical importance of Vitamin D	
Correlate the laboratory investigations with relevant clinical conditions	
5. Calcium & PO4- Metabolism	
Explain the dietary sources and daily recommended allowance of Calcium & PO4-	
Discuss the metabolism of Calcium & PO4- in the human body.	
Discuss the regulation of serum calcium concerning bone metabolism.	Interactive
Discuss the biochemical functions of Calcium & PO4-	Lecture/Tutorial
Discuss the clinical significance of Calcium & PO4- deficiency and its prevention.	
Discuss the clinical importance of Calcium & PO4- abnormalities	
Correlate the laboratory investigations with relevant clinical conditions	
PROTEIN METABOLISM	
6. Reactions of Amino acids	
Describe various sources and utilization of amino acids.	
Define and explain the reactions of amino acids (Domination, Transamination, etc.)	Interactive Lecture
Explain the nitrogen balance in the body	Lecture
Discuss the diagnostic value of plasma Aminotransferase	
Discuss the clinical significance of biomarkers	
7. Ammonia Metabolism	
Discuss the major sources of ammonia.	
Discuss the utilization, formation, and secretion of ammonia in the human body.	Interactive Lecture
Explain Ammonia metabolism and its detoxification	Lecture
Discuss the clinical significance and management of Ammonia toxicity	
8. Urea Cycle	
Discuss the process of amino acid oxidation and the production of urea.	
Describe the metabolic pathway of Urea synthesis	
Discuss the fate of urea	 Interactive
Describe the regulation of the urea cycle	Lecture/Tutorial
Discuss the clinical significance of urea cycle disorders	
Discuss the clinical importance of the Urea Cycle	
Correlate the laboratory investigations with relevant clinical conditions	

LIAGOAT NATIONAL MEDICAL COLLEGE	WODULL	
9. Phenylalanine & Tyrosine Metabolism		
• Discuss the metabolism of Phenylalanine & Tyrosine and its related disorders		
Discuss the metabolism of Melanin and its related disorder (Albinism)		
Discuss the metabolism of Thyroid hormones and their related disorder	ated disorder Interactive Lecture/Tutorial	
Discuss the metabolism of neurotransmitters and their related disorder	Lecture/Tutorial	
Discuss the clinical importance of metabolic abnormalities of the above amino acids		
Correlate the laboratory investigations with relevant clinical conditions		
10. Metabolism & Disorders of Tryptophan		
Discuss the metabolism of tryptophan and its related disorders		
Describe the importance of tryptophan-derived biologically important compounds	Interactive	
Explain the clinical significance of disorders of tryptophan	Lecture/Tutorial	
Discuss the clinical importance of metabolic abnormalities of the above amino acids		
Correlate the laboratory investigations with relevant clinical conditions		
11. Metabolism of Sulphur Containing Amino Acids		
Discuss the metabolism of Sulphur containing amino acids		
Describe the functions of Sulphur containing amino acids	Interactive	
List the steps of the formation of cysteine and methionine	Lecture/Tutorial	
Explain the clinical significance of disorders of Sulphur containing amino acids		
12. Metabolism of Branched Chain Amino Acids		
Discuss the metabolism of branched-chain amino acids	Interactive	
Describe the functions of branched-chain amino acids	Lecture/Tutorial	
Explain the clinical significance of disorders of branched-chain amino acids		
13. Catabolism of Carbon Skeleton of Amino Acids		
Explain the catabolism of the carbon skeleton of amino acids		
List the Glucogenic & Ketogenic amino acids	Interactive	
Explain the significance of the carbon skeleton of Amino acids	Lecture	
Describe the mechanism of entry of carbon skeleton in amino acid metabolism		
• Discuss the process of vitamin B12 as a co-factor and methyl donor in the metabolism of amino acids		
14. Estimation of Calcium & Phosphate		
Outline the bio-techniques for the detection of Calcium & Phosphate in a sample		
• Perform the estimation of serum Calcium & Phosphate.		
Correlate the laboratory investigations with relevant clinical conditions		
15. Estimation of Alkaline Phosphatase		
Outline the bio-techniques for the detection of Alkaline Phosphatase in a sample		
Perform the estimation of serum Alkaline Phosphatase.	Practical	
Correlate the laboratory investigations with relevant clinical conditions		
16. Chromatography		
Describe the principle of chromatography		
Describe different types of chromatography and HPLC		
Describe the instruments used in different types of chromatography		
Correlate the laboratory investigations with relevant clinical conditions		
002		

1st YEAR MBBS, LOCOMOTOR MODULE

17. Paper Chromatography
Describe the principle of paper chromatography
Describe the method of performance of paper chromatography
Perform amino acids detection on paper chromatography
Correlate the laboratory investigations with relevant clinical conditions

COMMUNITY MEDICINE

OBJECTIVES	LEARNING STRATEGY
Prevention of road traffic accidents	Interactive
Describe the accident prevention strategies and road safety	Lecture

FORENSIC MEDICINE

OBJECTIVES	LEARNING STRATEGY
Traumatic injuries to upper & lower limbs	Interactive
Discuss the injuries to upper and lower limbs due to trauma	Lecture

NEUROLOGY

OBJECTIVES	LEARNING STRATEGY
Neurologic lesions of upper limb nerves	
Describe the nerve injuries related to upper limb	Interactive Lecture
Discuss the clinical conditions related to nerves of the upper limb	

ORTHOPEDICS

OBJECTIVES	
Clinical presentation of common fractures and dislocations of upper and lower limb	
• Discuss the clinical presentation of common fractures and dislocations of upper and lower limb	Lecture

PATHOLOGY

OBJECTIVES	LEARNING STRATEGY
1. Bone fracture & repair	
Discuss the bone fracture & process of repair	Interactive
2. Osteoporosis	Lecture
Describe osteoporosis and its clinical presentation	

PHARMACOLOGY

OBJECTIVES	LEARNING STRATEGY
Pain Management	Interactive
Discuss joint & bone pain management in different clinical conditions of the upper limb	Lecture

PHYSIOLOGY

OBJECTIVES	LEARNING STRATEGY
1. Membrane Potential	
Define Nernst Potential, Nernst equation	Interestive
Explain the significance of Nernst's potential	Interactive Lecture
Define the origin of resting membrane potential	Lecture
• Describe the role of Na, K & Cl, Na-K ATPase pump	
2. Action Potential (phases, generation & propagation)	
Identify different phases of action potential	
Describe the generation & propagation of action potential	
Define threshold potentials	
3. Physiological properties of skeletal muscle	
Define contractility (isometric & isotonic) & excitability	
Define fatigue	Interestive
Define summation (spatial & temporal)	Interactive Lecture
Differentiate between tetanization, tetanus & tetany	Lecture
Describe briefly the staircase phenomenon (treppe)	
Define motor unit	
4. Mechanism of skeletal muscle contraction	
Describe briefly the structure of Sarcomere	
Explain the sliding filament mechanism & power stroke	
Define troponin tropomyosin complex	
5. Neuromuscular Junction Transmission	Interactive
List the components of the neuromuscular junction	Lecture

1st YEAR MBBS, LOCOMOTOR MODULE

Explain the sequence of events during the transmission	
Define end plate potential	
Describe excitation-contraction coupling	
Describe briefly the role of the Sarcoplasmic reticulum	
6. Disorders of Neuromuscular Junction	Interactive
• Identify disorders of the neuromuscular junction (Myasthenia gravis, Lambert Eaton syndrome)	Lecture
7. Muscle adaptation to exercise	
Identify the types of muscle fibers (type I & II)	Interactive
Describe the effect of exercise on muscular blood flow	Lecture
Define the effect of training, endurance & resistance on muscle fibers	
8. Introduction to power lab & performance of Nerve conduction velocity	
Describe different parts of power lab & their application in different experiments	
Determine nerve conduction velocity in human	
9. Electromyogram (EMG)	
Explain the physiology of muscle contraction & changes during EMG recording	
10. Simple muscle twitch (SMT) & Fatigue	Practical
Define simple muscle twitch & summation	
Identify the graphs of SMT & summation	
11. Summation & Tetanization	
Define tetanization & fatigue	
Identify the graphs of tetanization & fatigue	

PHYSIOTHERAPY

OBJECTIVES	LEARNING STRATEGY
1. Clinical manifestation of common shoulder problems	
Describe the common shoulder problems	
2. Hip & knee problems	Tutorial
Describe common knee problems	
Discuss clinical conditions related to it.	

RADIOLOGY

OBJECTIVES	LEARNING STRATEGY	
Radiologic anatomy of bones & joints of upper limb	Tutorial	
Discuss the fracture and other clinical conditions related to it.	TULONAL	

RHEUMATOLOGY

OBJECTIVES	LEARNING STRATEGY
1. Arthritis & its types	
Classify arthritis	
Discuss clinical conditions associated with it	Interactive Lecture
2. Gout	Lecture
Discuss the clinical presentation of the disease	

RESEARCH & SKILLS DEVELOPMENT CENTER

OBJECTIVES	LEARNING STRATEGY
Capeline bandage arm sling and care of amputated digit	
Perform the application of Capeline bandage on the arm or amputated stump Tu	
Perform figure of eight turn wrap technique to the upper limb	

SURGERY

OBJECTIVES	LEARNING STRATEGY
1. Clinical presentation of common breast disease	
Discuss the clinical presentation of common breast diseases	Interactive
2. Gluteal Abscess	Lecture
Describe the abscess on the gluteal region and discuss clinical conditions related to it.	

LEARNING RESOURCES

SUBJECT	RESOURCES
ANATOMY	A. GROSS ANATOMY 1. K.L. Moore, Clinically Oriented Anatomy 2. Neuro Anatomy by Richard Snell B. HISTOLOGY 1. B. Young J. W. Health Wheather's Functional Histology C. EMBRYOLOGY 1. Keith L. Moore. The Developing Human 2. Langman's Medical Embryology
BIOCHEMISTRY	A. TEXTBOOKS 1. Harper's Illustrated Biochemistry 2. Lehninger Principle of Biochemistry 3. Biochemistry by Devlin
	 A. TEXTBOOKS Textbook Of Medical Physiology by Guyton And Hall Ganong' S Review of Medical Physiology Human Physiology by Lauralee Sherwood Berne & Levy Physiology Best &Taylor Physiological Basis of Medical Practice B. REFERENCE BOOKS Guyton & Hall Physiological Review Essentials Of Medical Physiology by Jaypee Textbook Of Medical Physiology by Indu Khurana Short Textbook Of Physiology by Arthur NMS Physiology

ASSESSMENT METHODS:

- MCQs (Multiple Choice Questions)
- Objective Structured Practical/Clinical Examination (OSPE or OSCE)
- MCQs and unobserved OSPE will be conducted on the LNH&MC Moodle platform
- Observed OSPE will constitute multiple examiner-based stations

Internal Evaluation

- Students will be assessed comprehensively through multiple methods.
- 20% marks of internal evaluation will be added to JSMU final exam. That 20% includes mid-module & end of module examinations, mid-term & pre-professional examinations.

Formative Assessment

Individual departments may hold quizzes or short answer questions to help students assess their learning. The marks obtained are not included in the internal evaluation

For JSMU Examination Policy, please consult the JSMU website!

More than 75% attendance is needed to sit for the internal and final examinations

LNMC EXAMINATION RULES & REGULATIONS

- Students must report to the examination hall/venue, 30 minutes before the exam.
- The exam will begin sharply at the given time.
- No student will be allowed to enter the examination hall after 15 minutes of the scheduled examination time.
- Students must sit according to their roll numbers mentioned on the seats.
- Cell phones are strictly not allowed in the examination hall.
- If any student is found with a cell phone in any mode (silent, switched off, or on) he/she will not be allowed to continue their exam.
- No students will be allowed to sit in exams without University Admit Card, LNMC College
 ID Card, and Lab Coat.
- Students must bring the following stationary items for the exam: Pen, Pencil, Eraser, and Sharpener.
- Indiscipline in the exam hall/venue is not acceptable. Students must not possess any written material or communicate with their fellow students.

SCHEDULE:

WEEKS	1 ST YEAR	MONTH
8 WEEKS	LOCOMOTOR MODULE	8 th May 2023 To 8 th July 2023
4 WEEKS	RESPIRATORY MODULE	10 TH July 2023 To 5 th Aug 2023
5 WEEKS	CVS MODULE	7 th Aug 2023 To 9 th Sep 2023
*PRE-PROF EXAM		

*21-09-2023 to 23-09-2023
