# **STUDY GUIDE FOR RESPIRATORY II MODULE**

S.No	CONTENTS	Page No.
1	Overview	3
2	Introduction to Study Guide	4
3	Learning Methodologies	5
4	Module 4: Respiratory II	7
4.1	Introduction	7
4.2	Objectives and Strategies	8
5	Learning Resources	15
6	Assessment Methods	16
7	LNMC Examination Rules and Regulations	17
8	Schedule	18

Module name: Respiratory II

Year: Three Duration:4

Duration:4 weeks (Jul-Aug 2023)

*Timetable hours:* Lectures, Case-Based Integrated Learning (CBIL), Clinical Rotations, learning experience in LNH outreach centers, Laboratory, Practical, Demonstrations, Skills, Self-Directed Learning

### **MODULE INTEGRATED COMMITTEE**

MODULE COORDINATOR:	<ul> <li>Prof. Syed Mukkaram Ali (Forensic Medicine)</li> </ul>
CO-COORDINATORS:	<ul> <li>Dr. Sadia Qayyum (Forensic Medicine)</li> <li>Dr. Afifa Tabassum (DHPE)</li> </ul>

### **DEPARTMENTS & RESOURCE PERSONS**

BASIC HEALTH SCIENCES		
<b>COMMUNITY MEDICINE</b> Dr. Saima Zainab		
FORENSIC MEDICINE Professor. Syed Mukkaram Ali		
<b>MICROBIOLOGY</b> Professor Shaheen Sharafat		
<b>PATHOLOGY</b> Professor Naveen Faridi		
<b>PHARMACOLOGY</b> Professor Tabassum Zehra		
DEPARTMENT of HEALTH PROFESSIONS EDUCATION		
<ul> <li>Professor Nighat Huda</li> <li>Dr. Sana Farooq Shah</li> <li>Professor Sobia Ali</li> <li>Dr. Ahsan Naseer</li> <li>Dr. Yusra Nasir</li> </ul>		
<i>LNH&amp;MC MANAGEMENT</i> Professor K.U. Makki, Principal, LNH&MC Dr. Shaheena Akbani, Director A.A & R.T LNH&MC		

STUDY GUIDE COMPILED BY: Department of Health Professions Education

#### **INTRODUCTION**

#### WHAT IS A STUDY GUIDE?

It is an aid to:

- Inform students how the student learning program of the module has been organized
- Help students organize and manage their studies throughout the module
- Guide students on assessment methods, rules, and regulations.

#### THE STUDY GUIDE:

- Communicates information on the organization and management of the module. This will help the student to contact the right person in case of any difficulty.
- Define the objectives which are expected to be achieved at the end of the module.
- Identifies the learning strategies such as Interactive Lectures, small group teachings, clinical skills, demonstrations, tutorials, and case-based learning that will be implemented to achieve the module objectives.
- Provide a list of learning resources such as books, computer-assisted learning programs, web-links, and journals, for students to consult to maximize their learning.
- Highlights information on the contribution of continuous and module examinations on the Student's overall performance.
- Includes information on the assessment methods that will be held to determine every student's achievement of objectives.
- Focuses on information about examination policy, rules, and regulations.

### CURRICULUM FRAMEWORK

Students will experience an integrated curriculum.

**INTEGRATED CURRICULUM** comprises system-based modules such as the Locomotor system, Respiratory System, and Cardiovascular system which links basic science knowledge to clinical problems. Integrated teaching means that subjects are presented as a meaningful whole. Students will be able to have a better understanding of basic sciences when they repeatedly learn concerning clinical examples.

Case-based discussions, computer-based assignments, early exposure to clinics, wards, and skills acquisition in skills lab are characteristics of integrated teaching programs.

#### LEARNING METHODOLOGIES

The following teaching/learning methods are used to promote better understanding:

- Interactive Lectures
- Tutorial
- Case- Based Learning (CBL)
- Clinical Experiences
  - Clinical Rotations
- Skills session
- Self-Directed Learning

**INTERACTIVE LECTURES:** In a large group, the Interactive Lectures introduce a topic or common clinical conditions and explains the underlying phenomena through questions, pictures, videos of patients' interviews, exercises, etc. Students are actively involved in the learning process.

**TUTORIAL:** This format helps students to clarify concepts, and acquire skills or desired attitudes. Sessions are structured with the help of specific exercises such as patient cases, interviews, or discussion topics. Students exchange opinions and apply knowledge gained from Interactive Lectures, tutorials, and self-study. The facilitator's role is to ask probing questions, summarize, or rephrase to help clarify concepts.

**CASE-BASED LEARNING (CBL)**: A small group discussion format where learning is focused on a series of questions based on a clinical scenario. Students discuss and answer the questions by applying relevant knowledge gained previously in clinical and basic health sciences during the module and constructing new knowledge. The CBIL will be provided by the concerned department

**CLINICAL LEARNING EXPERIENCES:** In small groups, students observe patients with signs and symptoms in hospital wards, clinics, and outreach centers. This helps students to relate knowledge of basic and clinical sciences of the module and prepare for future practice.

CLINICAL ROTATIONS: In small groups, students rotate in different wards like Medicine, Pediatrics, Surgery, Obs, and, Gyne, ENT, Eye, Family Medicine clinics, outreach centers & Community Medicine experiences. Here students observe patients, take histories and perform supervised clinical examinations in outpatient and inpatient settings. They also get an opportunity to observe medical personnel working as a team. These rotations help students relate basic medical and clinical knowledge in diverse clinical areas.

**SKILLS SESSION:** Skills relevant to the respective module are observed and practiced where applicable in the skills laboratory.

**SELF-DIRECTED LEARNING** Students assume responsibilities for their learning through individual study, sharing and discussing with peers, and seeking information from Learning Resource Center, teachers, and resource persons within and outside the college. Students can utilize the time within the college's scheduled hours of self-study.

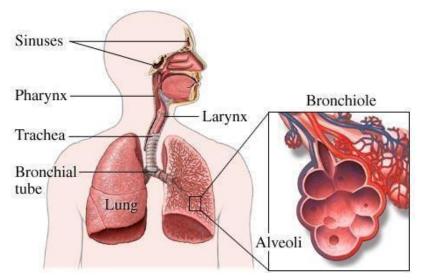

### **MODULE 4: RESPIRATORY II**

### RATIONALE

The Respiratory System II (RES II) module is designed to consolidate, and build on the First year Respiratory I module which covered basic medical sciences concepts for understanding the causes and treatment of diseases.

Tuberculosis is considered to be a major cause of ill health in Pakistan. The annual incidence rate of infectious Tuberculosis cases is estimated to be between 85-100/100,000 persons.<sup>1</sup>The exact prevalence of COPD in Pakistan is not known, but a large number of patients attend outpatient and emergency departments across most of the country. The socio economic burden of COPD is considerable. A part from smoking, urban air pollution is an important cause of COPD.<sup>2</sup>Pakistan at present falls in to a low risk lung cancer region in females and a moderate risk region for males and the highest registered increase between 1995 and 2002 was observed in the older age groups (65+).<sup>3</sup>

RES (II) will focus on the respiratory system, its associated diseases, treatment options, and prevention of the diseases such as obstructive lung diseases, hypersensitivity related diseases, pulmonary infections, respiratory failure and restrictive lung diseases. The community medicine learning will aim at sessions on preventive medicine and various program such as TB, DOTS and National tuberculosis control program of Pakistan. The module will enable students to relate their theoretical knowledge to real practice through common clinical presentations, case-based discussions, interactive lectures, patient interactions and simulated-based learning.

2. AnwarSK, Mehmood N, Nasim N, Khurshid M, Khurshid B. Sweeper'slungdisease: across-sectional study of an overlooked illness among sweepers of Pakistan. International journal of chronic obstructive pulmonary disease. 2013; 8:193

3. BhurgriY,BhurgriA,UsmanA,SheikhN,FaridiN,MalikJ,AhmedR,KayaniN,PervezS,HasanSH.Patho-epidemiology of lung cancer in Karachi (1995-2002). Asian Pacific journal of cancer prevention. 2006 Jan 25;7(1):60.

### **COURSE OBJECTIVES AND STRATEGIES**

At the end of the module the students will be able to:

### **COMMUNITY MEDICINE**

TOPICS & OBJECTIVES	LEARNING STRATEGIES
1. Introduction to Occupational health & Diseases	STRATEGIES
Describe occupational health	
Classify occupational health diseases	
Discuss measures for prevention and control of occupational health diseases	
Describe Lead poisoning	
2. Pneumoconioses and its prevention	
Define pneumoconioses	
List pneumoconioses diseases	
Discuss the control and prevention of pneumoconioses	Tutorial
3. Pulmonary tuberculosis and its prevention	
Discuss the causative organism of tuberculosis	
Explain why Tuberculosis remains a world-wide problem	
List Epidemiological Indices of tuberculosis	
Explain TB-DOTS Therapy	
Discuss Tuberculosis situation in Pakistan	
Discuss the control and prevention of tuberculosis	
4. Asthma and its prevention	
Describe Asthma	
Explain the clinical features & diagnosis criteria of Asthma	
Discuss the control and prevention of Asthma	
5. Chicken pox and its prevention	
Describe Chicken pox disease	
Describe the epidemiology, clinical features and diagnosis criteria of Chicken pox	
Discuss the control and prevention of Chicken pox	
6. Influenza and its prevention	
Describe influenza	Interactive
Discuss the history of Spanish flu pandemic	Lecture
Describe the epidemiology, clinical features and diagnosis criteria of influenza	
Discuss the control and prevention of influenza	
7. Diphtheria and its prevention	
Discuss the epidemiology of Diphtheria	
Explain the risk factors, consequences & clinical features of Diphtheria	
Discuss the control and prevention of Diphtheria	
8. Measles and its prevention	
Describe the etiology, epidemiology and clinical features of measles	
2023	Pagel8

<ul> <li>Explain the diagnostic criteria of measles</li> <li>Discuss the control and prevention of measles</li> <li><b>9. Pertussis and its prevention</b></li> <li>Describe the etiology, epidemiology and clinical features of pertussis</li> <li>Explain the diagnostic criteria of pertussis</li> <li>sedative Discuss the control and prevention of pertussis</li> <li><b>10. Air Pollution</b></li> <li>Discuss the situation of air pollution</li> <li>List the sources of air pollution on health</li> <li>Discuss the concept of greenhouse effects</li> <li>Describe the methods to control air pollution</li> <li><b>11. Pneumonia, SARS &amp; COVID-19</b></li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe the measures for COVID-19</li> <li>Explain clinical features of COVID-19</li> <li>Describe the measures for control and prevention of COVID-19</li> </ul>		
9. Pertussis and its prevention         • Describe the etiology, epidemiology and clinical features of pertussis         • Explain the diagnostic criteria of pertussis         sedative• Discuss the control and prevention of pertussis         10. Air Pollution         • Discuss the situation of air pollution         • List the sources of air pollution         • Explain the effects of air pollution on health         • Discuss the concept of greenhouse effects         • Describe the concept of global warming and ozone depletion         • Discuss the methods to control air pollution         11. Pneumonia, SARS & COVID-19         • Define pneumonia         • Classify different types of pneumonia         • Explain the mode of transmission and predisposing factors of pneumonia         • Describe the measures for control and prevention of Pneumonia and SARS         • Describe the epidemiology of COVID-19         • Discuss the epidemiology of COVID-19	Explain the diagnostic criteria of measles	
<ul> <li>Describe the etiology, epidemiology and clinical features of pertussis</li> <li>Explain the diagnostic criteria of pertussis</li> <li>sedative• Discuss the control and prevention of pertussis</li> <li><b>10. Air Pollution</b> <ul> <li>Discuss the situation of air pollution</li> <li>List the sources of air pollution on health</li> <li>Discuss the concept of greenhouse effects</li> <li>Describe the concept of global warming and ozone depletion</li> <li>Discuss the methods to control air pollution</li> </ul> </li> <li><b>11. Pneumonia, SARS &amp; COVID-19</b> <ul> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the control and prevention of Pneumonia and SARS</li> <li>Tutorial</li> </ul> </li> </ul>	Discuss the control and prevention of measles	
<ul> <li>Explain the diagnostic criteria of pertussis sedative• Discuss the control and prevention of pertussis</li> <li><b>10. Air Pollution</b> <ul> <li>Discuss the situation of air pollution</li> <li>List the sources of air pollution on health</li> <li>Discuss the concept of greenhouse effects</li> <li>Describe the concept of global warming and ozone depletion</li> <li>Discuss the methods to control air pollution</li> </ul> </li> <li><b>11. Pneumonia, SARS &amp; COVID-19</b> <ul> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Tutorial</li> </ul> </li> <li>Tutorial</li> <li>Explain clinical features of COVID-19</li> </ul>	9. Pertussis and its prevention	
sedative Discuss the control and prevention of pertussis  10. Air Pollution  Discuss the situation of air pollution  List the sources of air pollution on health  Discuss the concept of greenhouse effects  Describe the concept of global warming and ozone depletion  Discuss the methods to control air pollution  11. Pneumonia, SARS & COVID-19  Define pneumonia  Classify different types of pneumonia  Explain the mode of transmission and predisposing factors of pneumonia  Describe the measures for control and prevention of Pneumonia and SARS  Tutorial  Explain clinical features of COVID-19	Describe the etiology, epidemiology and clinical features of pertussis	
10. Air Pollution         • Discuss the situation of air pollution         • List the sources of air pollution         • Explain the effects of air pollution on health         • Discuss the concept of greenhouse effects         • Describe the concept of global warming and ozone depletion         • Discuss the methods to control air pollution         11. Pneumonia, SARS & COVID-19         • Describe the measures for control and prevention of Pneumonia         • Classify different types of pneumonia         • Explain the mode of transmission and predisposing factors of pneumonia         • Describe COVID-19         • Discuss the epidemiology of COVID-19         • Explain clinical features of COVID-19	Explain the diagnostic criteria of pertussis	
<ul> <li>Discuss the situation of air pollution</li> <li>List the sources of air pollution on health</li> <li>Explain the effects of air pollution on health</li> <li>Discuss the concept of greenhouse effects</li> <li>Describe the concept of global warming and ozone depletion</li> <li>Discuss the methods to control air pollution</li> <li><b>11. Pneumonia, SARS &amp; COVID-19</b></li> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	sedative• Discuss the control and prevention of pertussis	
<ul> <li>List the sources of air pollution</li> <li>Explain the effects of air pollution on health</li> <li>Discuss the concept of greenhouse effects</li> <li>Describe the concept of global warming and ozone depletion</li> <li>Discuss the methods to control air pollution</li> <li><b>11. Pneumonia, SARS &amp; COVID-19</b></li> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	10. Air Pollution	
<ul> <li>Explain the effects of air pollution on health</li> <li>Discuss the concept of greenhouse effects</li> <li>Describe the concept of global warming and ozone depletion</li> <li>Discuss the methods to control air pollution</li> <li><b>11. Pneumonia, SARS &amp; COVID-19</b></li> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	Discuss the situation of air pollution	
<ul> <li>Discuss the concept of greenhouse effects</li> <li>Describe the concept of global warming and ozone depletion</li> <li>Discuss the methods to control air pollution</li> <li><b>11. Pneumonia, SARS &amp; COVID-19</b></li> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	List the sources of air pollution	
<ul> <li>Describe the concept of global warming and ozone depletion</li> <li>Discuss the methods to control air pollution</li> <li><b>11. Pneumonia, SARS &amp; COVID-19</b> <ul> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul> </li> </ul>	Explain the effects of air pollution on health	
<ul> <li>Discuss the methods to control air pollution</li> <li>11. Pneumonia, SARS &amp; COVID-19         <ul> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul> </li> </ul>	Discuss the concept of greenhouse effects	
11. Pneumonia, SARS & COVID-19• Define pneumonia• Classify different types of pneumonia• Classify different types of pneumonia• Explain the mode of transmission and predisposing factors of pneumonia• Describe the measures for control and prevention of Pneumonia and SARS• Describe COVID-19• Discuss the epidemiology of COVID-19• Explain clinical features of COVID-19	Describe the concept of global warming and ozone depletion	
<ul> <li>Define pneumonia</li> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	Discuss the methods to control air pollution	
<ul> <li>Classify different types of pneumonia</li> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	11. Pneumonia, SARS & COVID-19	
<ul> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	Define pneumonia	
<ul> <li>Describe the measures for control and prevention of Pneumonia and SARS</li> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	Classify different types of pneumonia	
<ul> <li>Describe COVID-19</li> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	<ul> <li>Explain the mode of transmission and predisposing factors of pneumonia</li> </ul>	
<ul> <li>Discuss the epidemiology of COVID-19</li> <li>Explain clinical features of COVID-19</li> </ul>	Describe the measures for control and prevention of Pneumonia and SARS	Tutorial
Explain clinical features of COVID-19	Describe COVID-19	
·	Discuss the epidemiology of COVID-19	
Describe the measures for control and prevention of COVID-19	Explain clinical features of COVID-19	
	<ul> <li>Describe the measures for control and prevention of COVID-19</li> </ul>	

# FORENSIC MEDICINE

TOPICS & OBJECTIVES	LEARNING STRATEGIES
1. Asphyxia I	
Define asphyxia	
<ul> <li>Summarize the etiology, pathophysiology and classic signs of asphyxia</li> </ul>	
<ul> <li>Enumerate the different types of asphyxia and violent asphyxial deaths</li> </ul>	
Classify tissue anoxia according to Gordon's classification	
List the different types of hanging	
Explain the autopsy findings and medicolegal importance of hanging	
Differentiate between ante-mortem and post-mortem hanging	Interactive
2. Asphyxia II	Lecture
<ul> <li>Diagnose strangulation, throttling, suffocation, smothering, gagging and choking based on scenarios</li> </ul>	
• Discuss the mechanism, diagnostic features, and autopsy findings of traumatic asphyxia	
3. Asphyxia III	
<ul> <li>Define the types, mechanism and postmortem findings of drowning</li> </ul>	
<ul> <li>Describe the causes of death due to drowning</li> </ul>	
Highlight the importance of diatoms in deaths by drowning	
Define Sexual asphyxia (auto-erotic hanging)	

### LIAQUAT NATIONAL MEDICAL COLLEGE

4. Toxicology– Organophosphate insecticides poisoning	
List commonly used insecticides	
Classify organophosphate compounds	
• Describe the mode of action, signs and symptoms, treatment, postmortem findings and medico	
legal importance of organophosphate and Carbamate poisoning	
5. Toxicology- Chloro group of insecticides (D.D.T.)	
• Describe the mode of action, signs, symptoms, treatment and postmortem findings of DDT	
Poisoning	
6. Spinal Poisons	
• Describe the mode of action, signs and symptoms, treatment, postmortem findings and medico	Tutorial
legal aspects of poisoning by Strychnine and other spinal poisons	
7. Barbiturates and tranquilizers	
Describe the mode of action, signs and symptoms depending upon concentration in blood,	Interactive
treatment and postmortem findings of poisoning by Barbiturates and tranquilizers (therapeutic	Lecture
poisons)	
8. Toxicology- Irrespirable /Asphyxiants gases I (CO2 & Sewer gas poisoning)	
Describe the mode of action, signs and symptoms, treatment, postmortem findings and medico	
legal aspects of CO2 & sewer gas poisoning	
9. Toxicology- Irrespirable/Asphyxiants gases II (Carbon monoxide, Hydrogen sulphide and War	
gases poisoning)	
List the sources of Carbon monoxide	
<ul> <li>Describe the mode of action, signs and symptoms, treatment, postmortem findings and medico legal aspects of Carbon monoxide and hydrogen Sulphide poisoning</li> </ul>	
Classify war gases	Tutorial
Describe lacrimators and their treatment	laterial
10. Toxicology-Aluminum Phosphide & Paraquat poisoning	
List the sources of Aluminum phosphide and Paraquat	
• Describe the mode of action, signs, symptoms, treatment, postmortem findings and medico legal	
aspects of Aluminum phosphide and Paraquat poisoning	
11. Toxicology Naphthalene Poisoning	
• Describe the mode of action, signs, symptoms, treatment, postmortem findings and medico legal	
aspects of Naphthalene poisoning	

# PATHOLOGY

TOPICS & OBJECTIVES	LEARNING STRATEGIES
1. Congenital Anomalies of respiratory system, Atelectasis, Pulmonary edema	
Define Atelectasis and Pulmonary edema	
List the types of congenital anomalies, Atelectasis and Pulmonary edema	
• Describe the embryologic pathology, microscopic and clinical features of Congenital anomalies of	Interactive
Respiratory system	Lecture
• Discuss the classification, pathogenesis, morphology, causes and clinical features of Atelectasis	
and Pulmonary edema	_
Differentiate between pathogenesis of hemodynamic and micro vascular alveolar injury	

### 2. Acute lung injury (ALI) and acute respiratory distress syndrome (ARDS)

### • Define ARDS and ALI

• List the conditions associated with development of ARDS

• Discuss pathogenesis, morphological and clinical features of ARDS / ALI

3. Obstructive lung diseases I (emphysema, chronic bronchitis)

- Define emphysema and chronic bronchitis
- Classify emphysema
- Describe the various clinical forms of emphysema.
- Discuss the etiology, pathogenesis, morphology and clinical features of emphysema and chronic bronchitis
- 4. Obstructive lung diseases II (asthma, and bronchiectasis)
- Define asthma and bronchiectasis
- Classify asthma
- List the causes of asthma and bronchiectasis

• Discuss the etiology, pathogenesis, morphology and clinical features of asthma and bronchiectasis

- 5. Chronic Interstitial restrictive lung diseases
- Define restrictive diseases of lung (idiopathic pulmonary fibrosis, Nonspecific Interstitial Pneumonia, Cryptogenic Organizing Pneumonia, pneumoconioses and Pulmonary Involvement in Autoimmune Diseases)
- Classify restrictive diseases of lung
- Discuss the etiopathogenesis, morphology and clinical features of Chronic Interstitial restrictive lung diseases (idiopathic pulmonary fibrosis, Nonspecific Interstitial Pneumonia, Cryptogenic Organizing Pneumonia, pneumoconioses and Pulmonary Involvement in Autoimmune Diseases)
- 6. Pneumoconioses
- Define Pneumoconioses
- List the causative agents of Pneumoconioses
- Discuss the pathogenesis, morphology and clinical features of Pneumoconioses
- 7. Granulomatous diseases (Sarcoidosis, hypersensitivity pneumonitis, pulmonary eosinophilia, Smoking related interstitial diseases)
- Define granulomatous diseases (Sarcoidosis)
- Classify granulomatous diseases (Sarcoidosis)
- Discuss the pathogenesis, morphology and clinical features of Granulomatous diseases
- 8. Pulmonary Infections (Pneumonia)

• Define pneumonia

- Classify pneumonia. (community acquired pneumonia, hospital acquired pneumonia, healthcare associated pneumonia, aspiration pneumonia, chronic pneumonia, necrotizing pneumonia and pneumonia in the immunocompromised host)
- Discuss the morphology, pathogenesis, clinical features and diagnosis of Pulmonary Infections (Pneumonia)
- Discuss briefly aspiration pneumonia and lung abscess
- 9. Pulmonary tuberculosis

Define Pulmonary tuberculosis

• Discuss the morphology, pathogenesis, clinical features (primary, secondary latent and miliary) laboratory investigations of pulmonary tuberculosis

LIAQUAT NATIONAL MEDICAL COLLEGE 5 TEAR MIDDS, RESPIRATOR THE	ODOLL
10. Lung Tumors	
<ul> <li>Describe lung tumors (Squamous cell carcinoma, small cell carcinoma, adenocarcinoma, large cell carcinoma)</li> </ul>	
Classify lung tumors according to WHO	
Discuss the risk factors, pathogenesis, morphology, clinical features of lung tumors	]
Discuss briefly the staging & grading of carcinoma	
11. Pleural pathology (pleural effusion, Pneumothorax, pleural tumors)	Interactive
Discuss briefly pleural effusion and pneumothorax	Lecture/
Discuss the pathogenesis, morphology and clinical course of pleural tumors	Tutorial
12. Pulmonary vascular diseases	
• Define pulmonary vascular diseases (pulmonary embolisms, hemorrhage, infarction, hypertension and diffuse pulmonary hemorrhage syndrome)	Interactive
List the risk factors of pulmonary vascular disease	Lecture
Discuss the pathogenesis, morphology and clinical features of pulmonary vascular disease	1
13. Histopathology of Chronic Obstructive Pulmonary Disease (COPD)	
Discuss the histopathology of Chronic Obstructive Pulmonary Disease	]
14. Histopathology of pneumonia	
<ul> <li>Discuss the etiology and morphology of pneumonia.</li> </ul>	
15. Histopathology of Pulmonary Tuberculosis	
Discuss detailed morphology and pathogenesis of Pulmonary Tuberculosis	Practical
16. Pathology of lung tumors	Flactical
• Discuss the etiology, morphology and manifestations of lung tumors.	
17. Types of Hemolysis	
Discuss the types of hemolysis on blood agar	
18. Acid Fast Staining	
Discuss the principle, procedure and result of acid fast staining	

# MICROBIOLOGY

TOPICS & OBJECTIVES	LEARNING STRATEGIES
1. Classification of streptococci and Streptococcus Pneumoniae	
<ul> <li>Discuss the classification of streptococci and important properties, transmission, epidemiology, &amp; pathogenesis of Streptococcus pneumoniae</li> </ul>	
Describe clinical findings and laboratory diagnosis of Streptococcus pneumoniae infection	
Discuss treatment and prevention of Streptococcus pneumoniae infection	Interactive
2. Fungi Causing Pneumonia (Coccidioides, Histoplasma, Blastomyces, Paracoccidioides,	Lecture
Aspergillus, Pneumocystis, Mucor and Rhizopus)	
<ul> <li>Discuss the properties of fungi causing systemic fungal diseases</li> </ul>	
• Discuss the process of transmission, pathogenesis, and clinical findings of these fungal infections	
Discuss the epidemiology of these fungal infections	
Discuss the laboratory diagnosis, treatment and prevention of fungi causing pneumonia	

### LIAQUAT NATIONAL MEDICAL COLLEGE

3. Mycobacterium Tuberculosis Discuss the important properties, transmission, epidemiology, & pathogenesis of Mycobacterium Tuberculosis and Mycobacterium Leprae Describe clinical findings and laboratory diagnosis of M. Tuberculosis and M. Leprae • Discuss treatment and prevention of M. Tuberculosis and M. Leprae 4. Mycobacterium Leprae and Atypical Mycobacteria Discuss the important properties, transmission, epidemiology, & pathogenesis of Mycobacterium Leprae • Describe clinical findings and laboratory diagnosis of M. Leprae • Discuss treatment and prevention of M. Leprae Describe briefly Atypical Mycobacteria 5. Gram positive rods ((Corynebacterium diphtheriae and Listeria monocytogenes, Bacillus and Clostridium) • Discuss the important properties, transmission, epidemiology, & pathogenesis of (Corynebacterium diphtheriae and Listeria monocytogenes, Bacillus and Clostridium Describe the clinical findings and laboratory diagnosis of infections caused by these bacteria Discuss treatment and prevention of Corynebacterium diphtheriae and Listeria monocytogenes, Bacillus and clostridium 6. Gram negative rods (Haemophilus, Bordetella, Legionella) • Discuss the important properties, transmission, epidemiology, & pathogenesis of Gram negative rods • Describe clinical findings and laboratory diagnosis of Gram negative rods Discuss treatment and prevention of Gram negative rods 7. Respiratory viruses (Influenza and Parainfluenza, Respiratory Syncytial virus Coxsackie, Adenoviruses, SARS AND SARS II COVID 19) Discuss the important properties, transmission, epidemiology, & pathogenesis of respiratory virus. Describe replication cycle, clinical findings and laboratory diagnosis of respiratory virus Discuss treatment and prevention of respiratory virus Discuss SARS & SARS II (COVID 19) 8. Childhood viruses (Measles, Mumps, Rubella) • Discuss the important properties, transmission, epidemiology, & pathogenesis of childhood viruses Describe replication cycle, clinical findings and laboratory diagnosis of childhood viruses Discuss treatment and prevention of childhood viruses 9. Respiratory virus Parainfluenza (adeno, Corona, rhino) Discuss the important properties, transmission, epidemiology, & pathogenesis of Parainfluenza virus Describe replication cycle, clinical findings and laboratory diagnosis of parainfluenza virus Discuss treatment and prevention of parainfluenza virus 10. Bacteria causing atypical pneumonia (nocardia, actinomycetes and mycoplasma) • Define atypical pneumonia Discuss the important properties, pathogenesis of Actinomycetes and Mycoplasma Describe clinical findings and laboratory diagnosis of Actinomycetes and Mycoplasma Discuss treatment and prevention of Actinomycetes and Mycoplasma

### PHARMACOLOGY

TOPICS & OBJECTIVES	LEARNING STRATEGIES
1. Drugs used in the treatment of Bronchial Asthma & COPD	
Classify drugs used in the treatment and prevention of bronchial asthma and COPD	
• Discuss the treatment of bronchial asthma and COPD.	
<ul> <li>Discuss the basic and clinical pharmacology of drugs used in the treatment of bronchial asthma</li> </ul>	
2. Drug used in the treatment of Tuberculosis and Leprosy	
Classify anti-tuberculosis and anti-leprosy drugs	
Discuss the therapeutic classification of Anti-Tuberculosis Therapy (ATT) according to WHO	
Describe mode of action, toxicity and contraindications of ATT	
Describe the drugs used in multi-drug resistant tuberculosis	
Explain the drug management of extensive multi-drug resistant tuberculosis	Interactive Lecture/ Tutorial
• Describe the mode of action, pharmacokinetics, toxicity, contraindications and drug-drug interactions of anti-leprosy drugs	Tutonai
<ul> <li>Discuss anti-tuberculosis and anti-leprosy drugs with regards to their basic and clinical pharmacology</li> </ul>	-
3. Histamine & Anti-Histamines	
Discuss the properties and role of histamine	
Classify anti-histamines	
Discuss their basic & clinical pharmacology	
4. Anti-Tussives & Mucolytics (Expectorants)	
Describe the anti-tussives & mucolytic drugs	
Discuss their basic and clinical pharmacology	
• Explain the role of anti-tussives and mucolytic drugs in respiratory tract diseases.	]
<ul> <li>Discuss the basic and clinical pharmacology of anti-tussives and mucolytic drugs</li> </ul>	
5. Methods of Administration of drugs in treatment of bronchial Asthma	
Demonstrate the different methods of administration of drugs used in the treatment of	
bronchial asthma	-
Discuss their clinical importance	Practical
6. Effects of Histamine and Anti-histamine/Salbutamol on isolated trachea of Rabbit	
<ul> <li>Demonstrate the pharmacological action of histamine and anti-histamine drugs on isolated trachea of Rabbit</li> </ul>	
<ul> <li>Compare these actions with Salbutamol by using Power Lab System</li> </ul>	

### LEARNING RESOURCES

SUBJECT	RESOURCES
	<ul> <li>TEXT BOOKS <ol> <li>Community Medicine by Parikh</li> <li>Community Medicine by M Illyas</li> <li>Basic Statistics for the Health Sciences by Jan W Kuzma</li> </ol> </li> <li>TEXT BOOKS <ol> <li>Nasib R.Awan. Principles and practice of Forensic Medicine 1st</li> </ol> </li> </ul>
FORENSIC MEDICINE	<ul> <li>ed. 2002.</li> <li>Parikh, C.K.Parikh'sTextbook of Medical Juris prudence, Forensic Medicine and Toxicology. 7th ed.2005.</li> <li><b>REFERENCE BOOKS</b> <ol> <li>Knight B. Simpson's Forensic Medicine. 11thed.1993.</li> <li>KnightandPekka.Principlesofforensicmedicine.3rded.2004</li> <li>Krishan VIJ. Text book of forensic medicine and toxicology (principles and practice). 4th ed. 2007</li> <li>Dikshit P.C. Text book of forensic medicine and toxicology. 1st ed. 2010</li> <li>Polson.Polson'sEssentialofForensicMedicine.4thedition. 2010.</li> <li>Rao. Atlas of Forensic Medicine (latest edition).</li> <li>Rao. Practical Forensic Medicine 3rd ed,2007.</li> <li>Knight:Jimpson'sForensicMedicine10th1991,11thed.1993</li> <li>Taylor's Principles and Practice of Medical Jurisprudence. 15th ed.1999</li> </ol> </li> <li>CDs: <ol> <li>Lectures on Forensic Medicine.</li> <li>Atlas of Forensic Medicine.</li> </ol> </li> </ul>
PATHOLOGY / MICROBIOLOGY	<ul> <li>TEXT BOOKS         <ol> <li>Robbins &amp; Cotran, Pathologic Basis of Disease, 9<sup>th</sup> edition.</li> <li>Rapid Review Pathology, 4<sup>th</sup> edition by Edward F. Goljan MD</li> </ol> </li> <li>WEBSITES:         <ol> <li>http://library.med.utah.edu/WebPath/webpath.html</li> <li>http://www.pathologyatlas.ro/</li> </ol> </li> </ul>
PHARMACOLOGY	<b>TEXT BOOKS</b> <ol> <li>Lippincot Illustrated Pharmacology</li> <li>Basic and Clinical Pharmacology by Katzung</li> </ol>

#### **ASSESSMENT METHODS:**

- MCQs (Multiple Choice Questions)
- Objective Structured Practical/Clinical Examination (OSPE or OSCE)
- MCQs and unobserved OSPE will be conducted on the LNH&MC Moodle platform
- Observed OSPE will constitute multiple examiner-based stations

#### **Internal Evaluation**

- Students will be assessed comprehensively through multiple methods.
- 20% marks of internal evaluation will be added to JSMU final exam. That 20% includes mid-module & end of module examinations, mid-term & pre-professional examinations.

#### Formative Assessment

Individual departments may hold quizzes or short answer questions to help students assess their

learning. The marks obtained are not included in the internal evaluation

### For JSMU Examination Policy, please consult JSMU website!

More than 75% attendance is needed to sit for the internal and final examinations

### LNMC EXAMINATION RULES & REGULATIONS

- Students must report to the examination hall/venue, 30 minutes before the exam.
- The exam will begin sharply at the given time.
- No student will be allowed to enter the examination hall after 15 minutes of the scheduled examination time.
- Students must sit according to their roll numbers mentioned on the seats.
- Cell phones are strictly not allowed in the examination hall.
- If any student is found with a cell phone in any mode (silent, switched off, or on) he/she will not be allowed to continue their exam.
- No students will be allowed to sit in exams without University Admit Card, LNMC College ID Card, and Lab Coat.
- Students must bring the following stationary items for the exam: Pen, Pencil, Eraser, and Sharpener.
- Indiscipline in the exam hall/venue is not acceptable. Students must not possess any written material or communicate with their fellow students.

### **SCHEDULE:**

WEEKS	3 <sup>RD</sup> YEAR	MONTH
4 WEEKS	RESPIRATORY II MODULE	31 <sup>st</sup> July 2023
		26 <sup>th</sup> August 2023
5 WEEKS	GIT II MODULE	28 <sup>th</sup> August 2023
		30 <sup>th</sup> September 2023
PRE PROF. EXAMINATION*		

\*Final dates will be announced later
